To

**Professor Wallace Carl Riddick**

out of regard for his being the

**Students' friend,**

and in appreciation of his work in Mathematics since

his connection with the College, this, the

1907 volume, is dedicated

*W. C. Riddick*

## Wallace Carl Riddick.

**I**N 1802 there was a vacancy in the Engineering Department of the College. The attention of the Trustees was called to a bright young North Carolinian who had recently been graduated from Lehigh University. They learned that he was one of the first young men in the State to recognize the great future lying before Southern engineers, and to thoroughly equip himself for such duties. The Trustees elected Wallace Carl Riddick to the vacant chair. His unusual success in building up his department, his ability as a teacher, and his general usefulness as a member of the Faculty have more than justified the wisdom of his selection.

Professor Riddick was born on his father's plantation in Wake County in 1804. He is the son of Mr. Wiley G. Riddick, who was a Lieutenant in the Third Confederate Cavalry, and of his wife, Anna Ivy Jones. He was prepared for college at home. After three years at Wake Forest College, he entered the University, and completed the A.B. course in one year. For two years he taught at Mount Airy, and then entered Lehigh University. Three years later he was graduated with the Civil Engineering degree.

Two qualities marked Professor Riddick's entire college and university courses. These were concentration and thoroughness. He never entered a lecture-room without having previously mastered all the details of the recitation. Consequently he always stood among the foremost men of his class. His attention to collegiate duties, however, did not prevent his taking an active interest in athletics. At Lehigh he was a member of the University football team, and at one track-meet he bore off five medals.

After receiving his degree, Professor Riddick engaged for some years in practical engineering work. For a short while he was with a coal company in Kentucky. For two years he was resident engineer for the Roanoke Navigation and Water-Power Company, and had charge of the construction of its canal at Weldon. Just as he was on the point of entering the service of the United States Government as engineer for the construction of a dry dock at Port Royal, South Carolina, the College was fortunate enough to secure his aid in its recently begun work. He entered on his duties in 1892.

From the opening of his career as a college professor, Professor Riddick won the respect and admiration of his students. They recognized his knowledge, his vigor of mind, and his earnestness of purpose. They saw, too, that his teaching was an admirable blending of accurate scientific knowledge and practical attainments; for he has always been interested in the practical side of his work. His department has steadily increased in numbers and in enthusiasm, until now it is one of the largest in College. The students graduating from his careful instruction have succeeded in whatever field of labor they have entered.

Professor Riddick does not believe that a man's duties as a teacher ought to absorb his life, and cut him off from his fellowman. He holds that a college man should attend to his civic as well as his professional duties. He is a bank director, a cotton mill director, a member of the Governor's staff, a member of the executive committee of the Good Roads Association, and was for some years consulting engineer for the legal department of the Seaboard Air Line Railway. He has always been interested in his political and social responsibilities.

In 1893, Professor Riddick was most happily and congenially married to Miss Lillian Daniel, of Weldon, and his wife has stimulated and sympathized with him in all his work. He has four children.

## Editorial

**I**T HAS BEEN the constant aim and the highest ambition of the Board of Editors to present this, the fifth volume of the *ACROMETEK*, with as many improvements as possible. Whatever success we have had in this endeavor must be judged by you who turn these pages. We have tried to have represented everything in college life that is worth representing. In this, at least, we believe we have succeeded, and hope that in days to come you may still preserve this volume as a memento of 1906-'07.

This publication is the result of many weary hours of work, and has involved not a few disappointments. We are not satisfied altogether, for we realize that in many points we have failed to reach our ideal. But we have done the best we could.

We wish to express our appreciation to those who have lent a hand in the work, especially to our artists, Messrs. Lynch, Kenly, Webb, Armfield, Kueffner, and others, and to those of the Faculty and student body who have shown a kindly interest in the annual.

## Faculty.

GEORGE TAYLOE WINSTON, A.M., LL.D.,  
PRESIDENT.  
Professor of Political Economy.

DANIEL HARVEY HILL, A.M., Lit.D.,  
VICE-PRESIDENT.  
Professor of English.

WILLIAMS ALPHONSO WITHERS, A.M.,  
Professor of Chemistry.

WALLACE CARL RIDDICK, A.M., C.E.,  
Professor of Civil Engineering.

TAIT BUTLER, V.S.,  
Professor of  
Veterinary Science and Zoology.

FRANK LINCOLN STEVENS, M. SC., Ph.D.,  
Professor of  
Botany and Vegetable Pathology.

ELLERY BURTON PAINE, M.S., E.E.,  
Professor of Electrical Engineering and Physics.

CHARLES WALTER THOMAS, M.E.,  
Professor of Mechanical Engineering.

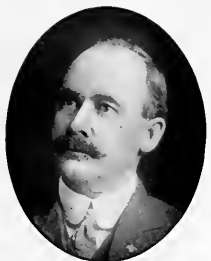

ROBERT E. LEE YATES, A.M.,  
Professor of Mathematics.

THOMAS NELSON,  
Professor of Textile Industry.

CHARLES M. CONNER, B.S.A., B.S.,  
Professor of Agriculture.

JOHN SOMERVILLE EATON YOUNG,  
First Lieutenant U. S. A.  
Professor of Military Science and Tactics.

## Assistants and Instructors

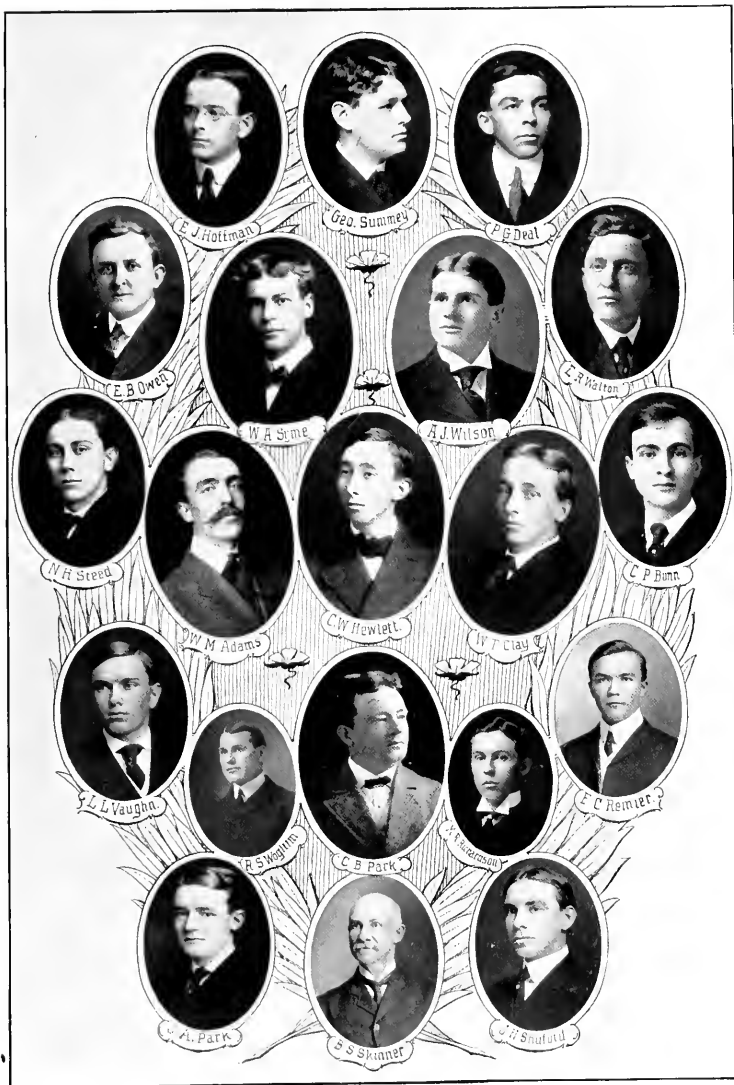

- WILLIAM NICHOL HUTT, B.S.A., *Professor of Horticulture.*  
BENJAMIN WESLEY KILGORE, M.S., *Lecturer on Soils and Fertilizers.*  
JOHN CHESTER KENDALL, B.S., *Assistant Professor of Dairy Husbandry.*  
GUY ALEXANDER ROBERTS, B.S., D.V.S., *Assistant Professor of Zoology and Anatomy.*  
BARTHOLOMEW MOORE PARKER, B.S., *Assistant Professor of Textile Industry.*  
CHARLES BENJAMIN PARK, *Superintendent of Shops.*  
WILLIAM ANDERSON SYMBE, B.S., M.S., Ph.D., *Instructor in Chemistry.*  
FRANKLIN SHERMAN, B.S.A., *Instructor in Entomology.*  
CARROLL LAMB MANN, B.S., C.E., *Instructor in Civil Engineering.*  
PINCKNEY GUSTAVE DEAL, *Instructor in Forge Shop and Pattern-making.*  
THOMAS SIMEON LANG, B.S., C.E., *Instructor in Civil Engineering.*  
GEORGE SUMMEY, Jr., Ph.D., *Instructor in English.*  
WINFRED MORSE ADAMS, B.S., *Instructor in Electrical Engineering.*  
FRANK REIMER, M.S., *Instructor in Horticulture.*  
JOHN HOUSTON SHUFORD, B.S., *Instructor in Dyeing.*  
ALFRED HENRY THIESSEN, B.S., *Instructor in Meteorology.*  
RUSSELL SAGE WOGLUM, A.B., M.S.A., *Instructor in Entomology.*  
WILEY THEODORE CLAY, B.E., *Instructor in Woodworking.*  
CHARLES HERBERT LAWRENCE, B.S., *Instructor in Drawing.*  
JOHN ALSEY PARK, B.E., *Instructor in Mathematics.*  
HERBERT NATHANIEL STEED, *Assistant in Textile Industry.*  
JAMES CLARENCE TEMPLE, B.Agr., *Assistant in Bacteriology.*  
ARTHUR JOHN WILSON, *Assistant in Chemistry.*  
ROBERT SETH CURTIS, B.S., *Instructor in Animal Husbandry.*  
ERNEST JENKINS HOFFMAN, Ph.D., *Instructor in Chemistry.*  
LILLIAN LEE VAUGHAN, B.S., *Instructor in Drawing.*  
CARL PHILIP BONN, B.A., *Instructor in English.*  
CLARENCE WILSON HEWLETT, B.S., *Instructor in Physics.*

## Class Poem

Four seasons have the flowers bloomed  
Since first we met in college halls;  
Day by day the hours have flown,  
Gone forever and gone for all.

But, do we not their value know?  
Could we fail to heed their call?  
Will not their memories with us go  
Through life, forever, and for all?

The sun is in the eastern sky,  
And as we gaze on the shining rays  
We resolve to be, to do, or die  
To reward these well-spent days.

First as Freshmen with doubting hope  
We came for college training—  
Came to know a higher scope  
And adjust for higher aiming.

Now as Seniors we take our leave,  
Well equipped for life's great race,  
Open hearted, let none deceive,  
Meet man as man face to face.

Three score less four we do number,  
Each a link in friendship's chain,  
Which, if broken by some blunder,  
Alma Mater welds again.

Class-mates and friends, we've been together  
Since four times the year has passed;  
Class-mates no more, but friends forever,  
Friends we'll be unto the last.

There's a future that bids us on,  
Extends to us a beckoning hand—  
Bids us leave our cherished home  
To venture in an unknown land.

But let's not be melancholy,  
For surely we'll meet again—  
It may not be in dear old Raleigh,  
But on some higher plain.

CLASS POET.

## Senior History

**T**O write a history of a class that has accomplished so much, and shown so much push and perseverance is no small task. It would tax the ability of the best of us to fittingly narrate our many phases, and with my poor talent I fear that I cannot put them properly, yet I will try with my meagre means to tell you some of the things about our class.

On September 3, 1903, those of us who had not been directed to Shaw, the Asylum, or the Penitentiary, marched up to the college doors to the tune of the Sophomores' whistle. With fear and trembling we paid the dues, registered, and then went before the mighty "Captain" to be assigned to our rooms. At first glance we were indifferent, but when we looked into those steel-gray eyes and heard his sharp tone of authority, we braced up and became respectful. We were soon to learn that he ruled with an iron hand, but that he had a heart as large as his authority, and that he was a friend to the Freshman as well as the old student.

One hundred and twenty-five of us registered, and, although we were strong in numbers, the "Sophs" soon made us weak in the knees. They gave us the best of attention, persisting in calling at all hours of the night, and as they usually forgot their cards they left their names on us in beautiful black and brown letters.

But even this could not last long, for our class soon organized, elected officers, and stuck together with that remarkable tenacity that we still have. The Sophs broke up our meeting, but we retired to "fourth" which was barricaded so thoroughly that none dared molest us.

Several of our class dropped out during this year, some because they could not follow the "straight and narrow path"; others, because they did not like to stay in their rooms on Saturdays and Sundays.

We soon took to athletics, and furnished some strong material both for football and baseball. And in the class baseball contest we defeated the Sophomores, to their great chagrin.

At the close of the first year we went home, somewhat larger in knowledge and a great deal larger about the head because we were "Sohps," and a Soph's a Soph.

The following September we returned, a hilarious band of seventy-eight. We missed many familiar faces, but we saw so many new ones which we thought needed our immediate attention, so that we lost no time in paying them calls, and teaching them singing, dancing, nature study (mostly animal calls), and the art of washing off lampblack and varnish without water. We were so well pleased with these visits that we repeated them often, and under our careful guidance the Freshmen soon learned the ways of the college. Once they were led astray by someone who told them to barricade the "fourth." They barricaded, and also got themselves in a trap, for we, by a strategic move gained entrance, and—told them it was wrong to use beds and mattresses in that manner.

As we taught the Freshmen well, we ourselves were well taught, and our class as a whole had a very high standing, both in scholarship and behavior. In athletics we furnished some of the best men, among them being Hardie, Sykes, Saddler and Watkins, and '07 was conspicuous in all the games.

At last came our Junior year—the best of all years to a college student, for he begins to see and feel things in a different way. He understands why he should have learned lessons of other years, and of what use they will be in the future. Then, too, he begins the practical part of his work, and it becomes more interesting.

We entered with fifty-eight of our former class mates, losing many of our best men from various causes. We were sorry to lose them, for some of them were the very backbone of our class; but, nothing daunted, we entered upon our duties with a spirit and activity that has made us an exceptional record. Our work was hard, but we knuckled down to it with a "stick-to-it-iveness" that was bound to carry us through.

In the beginning we had imbibed a spirit for the welfare of our College, and in this year the spirit began to manifest itself in work. We furnished some wonderful material for the best football team we had ever had, and on the baseball team we had McCatheran, Shuford, and Staples. Not only did we furnish men for the teams, but we also contributed a large supply of rooting and spirit that has pulled A. and M. out of many a tight place. This year we won the Faculty Football Cup in the class contest.

We elected an AGROMECK board for the following year, which early went to work, with a determination to do our best to make it the best yet.

Final examinations came, and there were many anxious faces, and much burning of the "midnight oil;" but in the end we were triumphant, and none were dropped from the roll.

Summer and the glad vacation, the blessed relief from studies and college work, came at last. We went our different ways with light hearts, but yet with a wee small yearning for that intangible something which departing from familiar haunts and faces gives.

We were Seniors—not the “gods” that we used to think the Seniors were, but just the same “naugh-seven” ourselves. We were disappointed. Our highest hopes had been to become Seniors; yet when we became Seniors we experienced no appreciable difference.

Every man that had stayed through his Junior year returned, and it gave us joy to shake the hands of each comrade and classmate as he returned. The year before we had petitioned and adjusted all matters pertaining to discipline and “liberties,” so that there has been no friction between our class and the governing bodies. Our class unity has been remarkable, and we have stuck together with a tenacity that seems marvelous. We feel that we have elected the best man for each place, and for this reason there have been no splits or factions in the class. Each thing that we have done has been for our College primarily and ourselves secondarily.

We have spent our last Christmas at home as college men, and in a few more days we will face the end and the beginning: the end of our happy college days, and the beginning of our struggle against the world in which a “man’s a man,” and no distinction or favors are made. We have learned a few things; left many unlearned; yet we know that it is not all in what we have learned from books, but much in the habits and associations we have found, that will help or harm us in the future.

We go from old A. and M. with sad hearts, we leave old comrades and associations perhaps never to see them again, to face the to’l that will eventually show our true worth; but we go with a loyalty to our Alma Mater that will not be shaken, and A. and M. will ever be a dear and bright spot in our memory.

HISTORIAN.

"Three such antics do not amount to a man."

HERBERT SCANDLIN BATTIE,

GREENSBORO, N. C.

*Civil Engineering.*

1st Lieut. Band '06-'07; 3d Sergt. '06; Corporal '06; member College Orchestra '05-'06; Y. M. C. A.; Guilford County Club '06-'07; Track Team '03-'04 and '04-'05.

Age, 22 years; height, 5 feet, 9 inches; weight, 139 pounds.

Just take a look at this young civil engineer and French scholar. He is another man at whose door Solomon's dog did not bark very long. His name is not an unusual one, bring H. S. Battie, C.E., and can be found on his souvenir of the occasion,—a sword. He will get mad if you don't call him "Reek."

*H. S. Battie*

"Well, then; I now do plainly see,  
This busy world and I shall ne'er agree."

JOE PITMAN BIVENS, POLKTON, N. C.

*Electrical Engineering.*

Triangular debater '07; Pres. Tanager Literary Society '06-'07; Associate Editor *Red and White* '06-'07; Vice-Pres. T. L. S. '05-'06; elected declaimer '05-'06; speaker inter-society debate '04-'05; Secretary T. L. S. '04-'05; Vice-Pres. Electrical Society '04-'05; Y. M. C. A.; Pres. Anson Club '06-'07.

Age, 23; height, 5 ft., 10 1-2 in.; weight, 138 lbs.

If Joe could but see himself as others see him! He lacks confidence in himself, but he has lots of nerve, for he is already engaged. Of his many good qualities, we note his excellent proficiency in drilling, as well as "legging."

*J. P. Bivens*

"If music be the language of love, play on."

CARNEY JOHN BRYAN,

WASHINGTON, N. C.

*Electrical Engineering.*

2d mandolin, Mandolin and Guitar Club '04-'05; 2d cornet, Orchestra, '05-'06; member Electrical Society; Electrical Engineers; 2d tenor in '07 Quartette; 1st cornet 'n Band '04-'05-'06.

Age, 27; Height; 5 ft., 8 1-2 in.; weight 136 lbs.

Carney J. Bryan hailed from the sand flats of Eastern North Carolina. "Comie" is a musician by vocation and an electrical engineer by avocation. He says he owes his taste for music to having watched the "sand fiddlers" perform on the coasts during low tide. No doubt he will invent some musical instrument to be propelled by electricity, that will surprise the whole world and cause the god of music to give up his "job."

*Carney J. Bryan.*

"I will praise any man that will praise me."

LINDSAY F. CARLETON, BOOMER, N. C.

*Electrical Engineering.*

1st Lieut. and Adjutant '06-'07; 2d Sergt. Co. E '05-'06; 2d Corp. Co. F '04-'05; Leazar Literary Society; Marshall L. L. S. entertainment '04-'05-'06; Censor L. L. S. '05; triangular debate '07; 1st tenor Glee Club '04-'05-'06-'07; Asst. Mgr. Glee Club '05-'06; Mgr. Glee Club '06-'07; Asst. Editor AGROMECK; Y. M. C. A.; Electrical Society; Sec. E. E. Society '06; Vice-Pres. Freshman Class '03-'04.

Height, 5 ft., 9 in.; weight, 150; age, 21.

A handsome young man from Western North Carolina, with a face that Cupid uses in his rock crushing business. We attribute his features and his musical voice to the mountains. But where he got that head for electricity is a mystery to the class.

*L. F. Carleton*

"A little body doth often harbor a great soul."

ROBERT HULL CARTER, KING'S CREEK, N. C.

*Electrical Engineering.*

Business Manager of AGROMECK; 1st Lieut. (resigned); 1st Sergt. Co. F '05-'06; Corporal Co. E '04-'05; Vice-Pres. Junior Class; Manager Class Baseball Team '04-'05.

Age, 21; height, 5 ft., 8 in.; weight, 130.

Well, I reckon he came from the mountains, and brings with him the whole-heartedness and courage of the typical mountaineer. He has a fine business head and ability for handling steam. Skating, an accomplishment of which he is complete master, is his favorite pastime.

*R. H. Carter*

"A slippery and subtle knave."

CLAUD COUNCIL, DAWSON, Σ Φ Ε

GRIFFON, N. C.

*Textile Engineering.*

Age, 21 years; height, 5 ft., 7 1-2 in.; weight, 145 lbs.

Permit us to present you to a young man who believes in keeping his dignity under all circumstances. He struck this "Bill" four years ago, in search of a diploma, and it is beginning to be thought by some of the class that he will get one. If he does, there is going to be something doing in the cotton manufacturing world, for he is going to be a "star." He isn't much of a ladies' man; he believes age should come before beauty, that is, his age before the beauty, whom he has often seen in his dreams, comes.

*C. C. Dawson*

"To dig up Greek and Latin roots I did not come to college."

JACOB TATUM EATON, FARMINGTON, N. C.  
*Agricultural Course.*

Y. M. C. A.; Tenerian Literary Society; Rural Science Club; Biological Club; Glee Club '05-'06 and '06-'07; Band; Press Club '04-'05 and '05-'06; Cor. Sec. Rural Science Club '03-'04; Censor T. L. S. '04-'05; Pres. Rural Science Club Fall Term '06-'07.

Weight, 188 lbs.; height, 6 ft. 1 1-2 in.; age 27 years.

A noble son of the soil, simply known as "Jake." With a slight effort he sings in the Glee Club and whistles sweet tunes on his clarinet. When at work he is happy; when idle he is restless. Although deprived of parental love and care in his early youth, his struggle has ever been onward and upward. And his life is an example of manhood to all.

*J. T. Eaton*

"What is the little one thinking about?  
Very wonderful things, no doubt."

SEBA ELDRIDGE, DUNN, N. C.

*Civil Engineering.*

Entered the Sophomore year, Class '07; member of Tenerian Literary Society; member of the Merriman Society of Civil Engineering; Sec. T. L. S. '04-'05; Vice-Pres. T. L. S. '05-'06; declamatory contest '05-'06; Marshal Triangular Debate '05-'06; Censor T. L. S. '06; Pres. T. L. S. '06-'07; Triangular Debate '06-'07; Literary Editor of *Red and White* '05-'06; same '06-'07; Editor of *AGROMECK*; honor roll '04-'05; same '05-'06.

Age, 21 yrs.; height, 5 ft., 4 in.; weight, 120 lbs.

And this short, stumpy little dancing man of the C. E. Society is usually called "Seba." Seems as if he is an all-round mistake,—too stumpy for an engineer, too square-headed for a preacher, and too quick-tempered for a teacher; but we haven't the least doubt that he would make good as a dancing master.

*Seba Eldridge*

"Men of all sorts take a pride to gibe at me."

BENJAMIN BRYAN EVERETT, A. Z.

PALMYRO, N. C.

*Agriculture.*

1st Lieut. Co. C '06-'07; Sergt. Co. D '05-'06;  
Corp. Co. A '04-'05; member Biological Club;  
Pullen Literary Society.

Age, 21 yrs.; height, 5 ft., 10 1-2 in.; weight,  
160 lbs.

This is one of the tallest timbers of the class and is yet young, but he is a "bull." He has a true military walk, is quiet, truthful, a hard student, and likes fun. But he is rather shy and timid, and his great fault is his unrestrained love for the "bonnie lassies." But we are sure he will pull through and proclaim Math. and English his favorite studies.

*B. B. Everett*

"I have much ado to know myself."

JOHN L. FERGUSON.

KENDAL, N. C.

*Electrical Engineering.*

Lieut. Co. E '06-'07; Sergeant Co. D '05-'06;  
Corp. Co. F '04-'05; Marshal oratorical contest  
L. L. Society '05; Secretary and Treasurer E. E.  
Society '05; member Executive Committee E. E.  
Society; Y. M. C. A.; Athletic Association;  
Leazar Literary Society; Age, 23; Height, 6 feet;  
Weight, 160 pounds.

Dear old big, good-natured, good-hearted John, who would miss his Sunday dinner any Sunday to do anyone a favor. He is a friend to everybody that knows him. He is an ardent admirer of the "fair sex," and declares he is never so happy as when he is sacrificing his time and heart to please the "fair sex." Perhaps he owes this disposition to the twenty-three years of his life spent in the mountains of Western North Carolina.

*John L. Ferguson*

E. V. Fowler

"He chuckles and nods and winks,  
As if his head were full of kinks."

ELIAS VAN BUREN FOWLER,

GLENVILLE, N. C.

*Electrical Engineering.*

Glee Club '04-'05, '05-'06, '06-'07; Class Football Team '04-'05, '05-'06; Class Baseball Team '05-'06; Corp. Co. F (resigned); Sergt. Co. F (resigned); 2nd Lieut. (resigned).

Age, 21 years; height, 5 ft., 9 in.; weight, 175 lbs.

The fat little fellow with the rosy cheeks who is never late for breakfast. Was born with a degree of common sense seldom seen in a child of that age, and since that time has fully decided that by hitching on to some theory he will be the successor of Thos. Edison, provided Mr. Edison is not a ladies' man. He actually thinks "Alternating Currents" is easy. Gee! but we didn't wait to get his views on any other subject.

"I never knew so young a body with so old a head."

CLEMENT LEINSTER GARNER,

BEAUFORT, N. C.

*Civil Engineering.*

Captain Co. D '06-'07; President Senior Class; President Civil Engineering Society '06-'07; Critic Ternerian Literary Society '06-'07; Censor T. L. S. '06-'07; Editor Agromock; Exchange Editor Red and White '06-'07; Y. M. C. A.; Sergt., Co. B '05-'06; Sec. Ternerian Literary Society '05-'06; Marshal Inter-Society Debate '05-'06; Honor Roll '05-'06; Punctuality Roll '05-'06; Marshall T. L. S. Entertainment '04-'05; Honor Roll '04-'05.

Age, 22 years; height, 5 ft., 10 in.; weight, 132 lbs.

Garner has worked problems that even puzzled the professors. Modesty, knowledge and fellow-feeling lies here. "Mr. President," he has often heard, and "Please exchange" he often writes. Ask him if he ever forgot how many feet there are in a pole.

C. L. Garner

"How much more elder art thou than thou seemest?"

LOVIC RODGERS GILBERT,

ROXBEL, N. C.

*Textile.*

Capt. Co. E '06-'07; Vice-Pres., Senior Class; Critic Tenerian Literary Society '07; Sergt. Co. A, '06; Honor Roll '05-'06; Chief Marshall Declamatory Contest '05-'06; Corp. Co. A '05; Honor Roll '04-'05; Secretary Freshman Class '08; Secretary Tenerian Literary Society '04-'05; Age, 23; height, 5 ft. 11 in.; weight, 145 lbs.

A "Textility Gentleman" proper, and a tireless worker. Always busy and hunting for something more to do. With all his industriousness, "Pap" is ever ready to swap a joke with you, and is never out of humor. A man liked by everyone because he is ever a *Man*.

*L. R. Gilbert*

"Thou dost speak masterly."

ROY JOSEPH GILL,

RALEIGH, N. C.

*Civil Engineering.*

President "Wake County Club"; Science Editor *Red and White*; appointed Lieut. Co. D '06-'07; Sergt. Co. C '05-'06; Senior Class Poet; Member Civil Engineering Society.

Age, 22; height, 5 ft., 10 in.; weight, 148 lbs.

Being class poet, Roy is naturally a man of brain. He shows this by his admiration of the fairer sex, writing of them by day, dreaming of them (one) by night, and we would judge, ere two summers more, that "I will" will be said twice.

*Roy J. Gill*

"He thinks too much; such men are dangerous."

ROBERT STRICKLER GRAVES,

SYRIA, VA.

*Electrical Engineering.*

2nd Lieut. Co. D '06-'07; Sergt. Co. F '05-'06; Scrub Foot-ball Team '03-'04; Substitute Varsity F. B. Team '04-'05; Coach Class F. B. Team '04-'05; Champion Class F. B. Team '05-'06; Y. M. C. A.; Historian Fresh. Class; Secretary and Treasurer Soph. Class; Vice-Pres. Pullen Literary Society '06; Librarian '04; Sec. First Inter-Society Declamatory Contest '06; Editor AGRO-MECK; Triangular Debate '07; Sec. and Treas. E. E. Society '04-'05; Librarian same '04; Pres. and Toast Master "Old Dominion Club" '06-'07. Age, 24; height 5 ft. 8 in.; weight 185 lbs.

Big-hearted, big-bodied, broad-minded, and curly-headed is this Virginia orator. He is an artist at love-making, and can do almost anything if his bosom friend and adviser, Whitehurst, is near. He believes in the old maxim that bluff is three-fourths of the game. P. O. inspector.

Robert S. Graves.

"With a good leg, and a good foot, and money enough in his purse, such a man could win any woman in the world—if he could get her good will."

GEORGE ROM HARDESTY,

RALEIGH, N. C.

*Electrical Engineering.*

Capt. Co. B '06-'07; 1st Sergt. Co. C '05-'06; Corp. Co. A '04-'05; Sergeant-at-Arms Leazar Literary Society '05-'06; Marshall Declaimers Contest '06; Vice-Pres. of Wake County Club.

Age, 21; height, 6 ft.; weight, 158 lbs.

Four long years of antagonistic struggling against Math. has brought him within the radius of a Senior. While theory is the fundamental principle of science, "a practical mystic is invincible," and as long as common sense and friendship attain merit, his success is assured.

George Hardesty.

"But, like a comet, I was wondered at."

PHILIP WILLIAM HARDIE, K. Σ.,

BROWN SUMMIT, N. C.

*Civil Engineering.*

Entered Soph. Class; Capt. Co. A '06-'07; 1st Sergt. Co. A '05-'06; Corp. Co. B '05; Varsity Foot-ball '04-'05-'06; Scrub Base-ball Team '05; Class Base-ball Team '06; Pres. Athletic Association '06; Pres. Guilford County Club '06-'07; Pres. German Club '07; Vice-Pres. German Club '06; C. E. Society; member S. E. C.

Age, 22 years; height, 5 ft., 11 in.; weight, 179 lbs.

Can you imagine a more suitable name for a red-bearded fellow, than "Scotch"? He came to us in our Soph. year, and we tell you, gentlemen, that "it is better to be born lucky than rich." He is hard to lose in a football game; but with girls—lost. "Cupid" is his latest name.

*P. W. Hardie*

"My beauty did haunt me in my sleep."

JOKTON LAFAYETTE HEMPHILL, Σ. Φ. Ε.

MORGANTON, N. C.

*Electrical Engineering.*

Mgr. Varsity Base-ball Team '07; Asst. Mgr. '06; 1st Lieut. Co. A '06-'07; 1st Sergt. Co. B '05-'06; 1st Corp. Co. B '04-'05; Y. M. C. A.; Commencement Marshall '06; Marshall L. L. S. Annual May Debate '04-'05; Tennis Club; Class Foot-ball Team '05-'06; Scrub Foot-ball Team '05-'06; Chief Rooter '06; Vice-Pres. Athletic Association '05; Sec. Faculty Advisory Committee on Athletics; E. E. Society; "Mountaineer Club."

Age, 21 years; height, 5 ft., 11 in.; weight, 157 lbs.

This is our athletic man who spends his summers in Atlanta. He came to College looking for excitement, and calculus satisfied his longing. He has had many experiences; made a few fortunes, but unlucky for his descendants, they are gone. He has a broad mind and a quick wit. Also one serious failing—the mirror.

*J. L. Hemphill*

"Thou sayest an undisputed thing  
In such a solemn way."

LAWRENCE JAMES HERRING, A. Z.,

CLINTON, N. C.

*Agricultural Course.*

2nd. Licit. Co. A; Editor Agromeck; Junior Historian; Charter Member Biag. Society; member Y. M. C. A.; Biological Club; Rural Science Club; Farmers' Sub-Allance, West Raleigh; Athletic Association; Chairman Class Committee to wait on Board of Trustees and Faculty '06; Marshal L. L. S. Debate '05; special student in veterinary medicine '06-'07; "A non blacked dock."

Age, 24; height, 5 ft., 8 in.; weight, 147 lbs.

One who is reasonable and firm, but has opinions of his own. He has always stood by his class in time of trial, and has endeavored to make '07 the most notable class of the school. He has become so attached to his work till he finds more pleasure in rattling the dry bones of a dead beast than handling the cold steel bars around the forge. His highest ambition seems to be to guide the surgeon's knife and master pharmacology.

L. J. Herring

"He was a wight of high renown."

GUY FRANCIS HINSHAW.

WINSTON-SALEM, N. C.

*Civil Engineering.*

Capt. Co. C '06-'07; member Agromeck Board; Local Ed. *Red and White*; Manager Track Team '06-'07; Treas. Athletic Asso. '06-'07; Trump. '06-'07; member Civil Eng. Soc.; 1st Sergt. Co. D '05-'06; Sec. Athletic Asso. '05-'06; Chief Marshal '05-'06; Champion Class Football Team '05-'06; Pres. Class '04-'05; Class Football Team '04-'05; Corpl. Co. D '04-'05; Commencement Marshal '04-'05; Treas. Winston-Salem Club '03-'04; Non-blacked Dock '03-'04.

Age, 26 years; height, 5 ft., 6 3/4 in.; weight 134 lbs.

"Guy," to the world, is he. But you have only to know him, when you see he is not the "guy" his name implies. Short in stature, but long in good, honest work. He has won the esteem of all classes and never forgets the ladies.

G. F. Hinshaw

*Wm N. Holt*

"His hours filled with riots, banquets, sports."

WILLIAM NORMAN HOLT, SENIOR.

SMITHFIELD, N. C.

*Textile Engineering.*

Capt. Band '06-'07; Pres. German Club '06; Pres. Tennis Club '06-'07; Vice-Pres. Tennis Club '04-'05; Capt. Tennis Team '05; Vice-Pres. Athletic Asso. '04; Sec. Athletic Asso. '03; Treas. German Club '05; 1st Sergt. Band '05-'06; Corpl. Co. F '04; Class Base-ball Team '04-'05-'06; Saturday Evening Club; Class Historian; Textile Society; Glee Club '07.

Age, 20 years; height, 6 ft.; weight 150 lbs.

The only titled gent. of the Textile push; a profound believer in the theoretical side of all things, for practice means work. Thinks he has troubles enough of his own without having the faculty add a few hours more to his schedule each term. Such things as Temperance Unions are not in his line. His hobbies are women, ponies, and music.

"Thou seekest the greatness that will overwhelm thee."

ALBERT CARL JONES.

TRINITY, N. C.

*Agriculture.*

Vice-Pres. Y. M. C. A.; Delegate Southern Student Conference, Asheville, N. C.; Biological Club; Pres. Rural Science Club '07; winner second agricultural prize '04; Corp. Co. D '04-'05; Quartermaster Sergt. '05-'06; 1st Lieut. and Quartermaster '06-'07; Sec. Pullen Literary Society '05.

Age, 22; height, 5 ft., 8 in.; weight, 145 lbs.

Do we speak enough for this child when we say he is one of the sturdy Quaker type? This boy realizes there is a God and seeks His companionship. Of course he is an officer and has a military bearing, but he never likes to wear a sword. He claims riches is not happiness, and wants to settle on a farm and live that happy life of freedom.

*Carl Jones*

"My mind to me, a kingdom is."

WILLIAM WHITMORE JONES,

FRANKLIN, N. C.

*Electrical Engineering.*

Mountaineer Club; Y. M. C. A.

Age, 22 years; height, 5 ft., 10 1-2 in.; weight, 170 lbs.

Everything that is noble and generous is brought out in him. His smile is unsurpassed by anything except his good nature underlying it. He has about got us all to thinking that Macon County is the only place on earth, but everyone has an idea or two of his own. He claims to be extremely conservative, but has a sly tendency toward patent leathers, white vests, and plug hats.

*W. W. Jones.*

"O, he was gentle, mild, and virtuous."

LAFAYETTE FRANCK KOONCE,

*Agriculture.*

Commencement Marshal '03-'04; member Biag. Society; winner Zenner Medal; winner Metropolitan Medal; elected Editor-in-Chief of Agr. Education; Vice-Pres. of Tenerian Literary Society.

Age, 26; height, 5ft., 10 1-2 in.; weight, 165 lbs.

Here is a man who will not be satisfied with a "B.S." but thinks "A.D.V.S." will do more for him in solving life's problem. After attaining this degree, it is prophesied he will return to Richland County, where he will take unto himself a "better half" and will show his fellow-farmers a few things. He is truly a man that will succeed in life, if the old saying "where there is a will there is a way," is true. He is admired by all his classmates for his manly disposition, and by the fair sex for his timidity.

*L. F. Koonce*

"Whose chin is but enriched with one appearing hair."  
 CHARLES EDWARD LATTA, S. N.,

RALEIGH, N. C.

*Textile Engineering.*

Textile Society '03; Sec. Wake County Club '03.

Age, 20 years; height 5 ft., 7 in.; weight, 130 lbs.

Ah! here's our ladies'-man; he can talk for hours at a time and seldom ever blushes; says the happiest moments of his life are when his girl calls him "Mister Latta." He is deeply in love with all members of the faculty with whom he is acquainted. But of all his accomplishments, his power to work is his greatest, though he thinks his health insufficient to permit his doing any more till the government establishes a four-hour per day system. His highest ambition is to teach steam in Cornell University.

*C. E. Latta*

"I am Sir Oracle; and when I speak, let no dog bark."  
 LEWIS EDGAR LOUGÉE,

RALEIGH, N. C.

*Chemistry.*

Age, 21 years; height, 5 ft., 8 in.; weight, 150 lbs.

A good-hearted gay French lad, who has recently got next to some "dough." Places chemistry second only to a pretty chorus girl. A tourist of some note; has done New York, Cary, Method, and will soon cross the creek.

*L. E. Lougee.*

"Rare on earth is such sublime ambition found."

HENRY KREIGER McCONNELL,

LOUISVILLE, KY.

*Chemistry.*

Entered Soph. Class; Asst. Bus. Mgr. of Agromeck; 1st Lieut. Co. E; Class Foot-ball Team '05-'06; Honors in Scholarship '05-'06.

Age, 20; height, 6 ft., 1 in.; weight, 158 lbs.

From the land of "beautiful women, fast horses, and good liquor." While passing through this country three years ago looking for something that would assist him in killing time, spied this place; as it "looked good to him," he decided to stay. And since that time he has had the chemical department just where he wanted it. His pastime is going to see the ladies, and it is great to see the smile that illumines his handsome face upon such occasions.

*H. K. McConnell*

"His addiction was to courses vain."

OSCAR FRANKLIN McNAIRY,

GREENSBORO, N. C.

*Civil Engineering.*

Editor-in-Chief Red and White '06-'07; Class Historian '06-'07; member Agromeck Board '06-'07; Librarian C. E. Society; Guilford County Club; Class Foot-ball Team '04; Champion Class Foot-ball Team '05; Sergt. Co. E '05-'06; "Senior Private."

Age, 22; height, 6 ft., 1 1-2 in.; weight, 167 lbs.

"Members of the staff will please hand in their material for Red and White before to-morrow night; this will positively be your last chance." "Mack, have you written Jim Lynch?" "Mack, when are you going to hand in that history?" His patience only goes so far.

*O. F. McNairy*

"Ah, me! What perils do environ  
The man that meddles with cold iron."

EUGENE FRANKLIN MEADOR,

REIDSVILLE, N. C.

*Mechanical Engineering.*

A non-resident, having spent one night only in College; Chief Draughtsman of "Senior Mechanics"; Licut. Co. B '06-'07; 2nd Sergt. Co. F—transferred to C '05-'06; Corp. Co. E '04-'05.

Age, 21; height, 5 11 1-2 in.; weight, 138 lbs.

Well, just call him Mr. Meadows, as that is the most appropriate name he has, and *they* all call him that. He is a wild customer, but no wonder,—he came from Rockingham County, but came to the wrong place. He may some day be a mechanical engineer, but has missed his calling; he ought to have been a lawyer, as he will even argue with himself, if no one else is handy.

"I am sick of this false world."

BENNETT TAYLOR MIAL,

RALEIGH, N. C.

*Mechanical Engineering.*

Day student; Soph. Base-ball Team '05; Treas. Wake County Club; Pres. Senior Mechanics.

Age, 20 years; height, 6 ft.; weight, 156 lbs.

Let us introduce to you Mr. B. T. Mial, otherwise known as "Ichabod." This long, lazy, lanky, lying, lolster is a native of Wake County. Solomon's dog didn't bark at his door very long, but nevertheless he has plenty of bull-dog tenacity, and is a mixture of machinist and jug-maker, in which the jug-maker shows the stronger.

"I know not why I am so sad."

FRANK CURTIS MICHAEL.

GIBSONVILLE, N. C.

*Electrical Engineering.*

Entered Soph. Class from Elon College '04; Tenebran Literary Society; Electrical Society; Y. M. C. A.; Sec. T. L. S. '05-'06; Sec. Inter-Society Debate '06; Vice-Pres. Guilford County Club '06-'07.

Age, 21 years; height, 5 ft., 10 1-2 in.; weight, 138 lbs.

We know little of his first two years in College, as his room was his loafing place, and his books were his friends. He always thinks twice, and then waits awhile before he acts. He seldom complains, and never "cusses," and from the expression on his face you can't tell whether his report pleases the old man or not. Ladies are not in his line.

*F. C. Michael*

"We thank the gods our Rome hath such a soldier."

JOHN MAPLE MILLS.

RALEIGH, N. C.

*Mechanical Engineering.*

2nd Lieut. Co. B '06-'07; 3rd Sergt. Co. E '05-'06; Corpl. Co. E '05-'06; Glee Club '06-'07; Glee Club '05-'06; Baritone Senior Quartette '06-'07; Class Base-ball Team '04-'05-'06.

Age, 20 years; height 5 ft., 8 1-2 in.; weight, 145 lbs.

And this is J. Maple Mills, better known as "Bully." He is the man that all the girls love, but it never effects him. He is never in love, but can give anyone points on "How to treat your girl." An expert phrenologist, barrel heads being his long suit. He sometimes legs "Leander" by taking him out hunting; but he's all right.

*J. Maple Mills*

"If he be sad, he wants money."

HENRY STARBUCK MONTAGUE, K. Σ.,

WINSTON-SALEM, N. C.

*Chemistry.*

Editor Red and White '06-'07; Vice-Pres. Class '04-'05; Vice-Pres. Winston-Salem Club '05-'06; Sec. Berzelius Chemical Society '05-'06; Thalerian German Club; Corpl. Co. E '04-'05; Sergt. Co. B '05-'06; "Senior Private" '06-'07.

Age, 21; height 5 ft., 9 in.; weight, 130 lbs.

A past-master of the science of "Ponetics," of which department he is Dean. Monte is also a chemist of some note, but is overjoyed when his name appears in the morning paper as "Mr. H. S. Montague, of Winston, was a guest of the Yarbrough last evening."

*H. S. Montague*

"Thou are a merry fellow and carest for nothing."

JOHN LIGHTFOOT MORSON, Σ. N.,

RALEIGH, N. C.

*Civil Engineering.*

German Club.

Age, 18 years; height, 5 ft., 8 1-2 in.; weight, 145 lbs.

Say "Toby," and he will smile. He even comes on class anywhere from fifteen to thirty minutes late, with a "standing broad grin." Without his adviser, Tillet, we refrain from prophesying his fate.

*J. L. Morson*

"I am not shaped for sportive tricks."

JAMES ELWOOD OVERTON, A. Z.

AHOSKIE, N. C.

*Agriculture.*

2nd. Lieut. Co. C '06-'07; Officio Biag. Society '06-'07; Leazar Literary Society; Y. M. C. A.; Biological Club; Rural Science Club; Farmers' West Raleigh Sub-Alliance; Charter Member of Biag. Society; Sergt. Co. F '05, and Co. D '06; Honors for punctuality '04-'05; Sec. Rural Science Club '04.

Age, 23; height, 5 ft., 5 in.; weight, 136 lbs.

Here is one who claims a blessing because he is from the town Ahoskie. His business eye is fine, and many of his class-mates say he will be a merchant instead of a "tiller of the soil," though we believe he is more inclined to write love stories. He is characterized with a sleepy head which knows nothing of a noisy house. And his next unavoidable characteristic is shortness, and so resolved, named and known by his class as "Shorty."

*J. E. Overton.*

"I clothe my naked villainy and seem a saint  
when most I play the devil."

JAMES CALEB PARKER.

ELIZABETH CITY, N. C.

*Electrical Engineering.*

Age, 22 years; height, 5 ft., 9 in.; weight, 140.

James Caleb Parker, from the "herring town," came to the College about four years ago. When he arrived the Sophs. presented him with a generous supply of Baby Elite polish, which caused him to get in a bad humor, from which he has never recuperated. However, Jim is an up-to-date electrical artist, and no doubt will return to his native town to furnish lights for his friends to pack fish by for the Northern markets—if there are no ladies around.

*J. C. Parker.*

"I can no longer brook thy vanities."

THOMAS FRANKLIN PARKER,

RALEIGH, N. C.

*Agriculture.*

Biological Club; Tennis Club '04; Sec. Rural Science Club '05; Chaplain P. L. S. '05; Vice-Pres. P. L. S. '06; Pres. P. L. S. '07; Handbook and Devotional Chairman Y. M. C. A. '07; Amateur Photo. Club; Glee Club '07; Sergt. Band '06; Principal Musician of Band, ranking as 1st Lieut. '07; Biag. member.

Age, 22 years; height, 6 ft.; weight, 168 lbs.

Here is one in whom we can say there is no harm. Though he claims he doesn't know his calling, yet his drawings show he is skillful, and this gives him an outlet. His intentions are very good. To punish him most would be to shut him up with a room of books.

*T. Frank Parker*

"Some men were born for great things,  
Some were born for small;  
Some—it is not recorded why  
They were born at all."

FRED MAYNARD PARKS,

MORGANTON, N. C.

*Electrical Engineering.*

Drum Major '06; Corpl. Co. E; Junior Baseball Team '06; Sophomore Baseball Team '05; Sec. Senior Class.

Age, 22 years; height, 6 ft., 1 in.; weight, 145 lbs.

Here's he who hails from Morganton, with a brain that works like an alternating current. He knows when and how to study. This is proven by the fact that he never comes up lacking when there is a preliminary on hand. He delights in worrying "Jock," and thinks women should work for themselves.

*Fred M. Parks*

"Mislike me not for my complexion."

ARTHUR LEE PASCHAL, BLAG.

VAUGHAN, N. C.

*Agricultural Course.*

Y. M. C. A.; Pres. Leazar Literary Society 2nd Term '06-'07; Vice-Pres. Rural Science Club 2d Term '03-'04; Sec. Rural Science Club 1st Term '03-'04; winner of one \$30 prize essay contest in Rural Science Club; Biological Club; was out of College 3rd term '03-'04, and all of '05-'06.

Age, 23 years; height, 5 ft., 10 in.; weight, 145 lbs.

Social life is now overpowering him in his Senior year. His face shows marks of youth; his reasoning, that of a judge. He joined our class but one year ago, and now has won the worthy title '07. We find him a hard student, a hard worker in Y. M. C. A., and in debate you can't get around him. So we recommend, "Take him, he is what he is."

*A. L. Paschal*

"I am monarch of all I survey;  
My right there is none to dispute."

GUY PINNER, K. Σ.

ELIZABETH CITY, N. C.

*Civil Engineering.*

Business Manager Red and White '06-'07; Editor ACROMECK '06-'07; Champion Class Football Team '05-'06; Manager Class Baseball Team '05-'06; Y. M. C. A.; charter member Merriman Society Civil Engineers; Thalerian German Club; Sec. Athletic Asso. '06-'07; "Senior Private."

Age, 19; height, 6 ft., 1 in.; weight, 165 lbs.

Without his cue, what on earth would he do? He will get into almost anything where there is a chance, whether it is eating, courting, or a dance. Truly the long man of the class is this same Guy.

*Guy Pinner*

"Turn to him any cause of policy,  
The Gordian knot of it he will untiose."

WINSLOW GERALD PITMAN,

LUMBERTON, N. C.

*Mechanical Engineering.*

1st Lieut. Co. D '06-'07; Sergt. Co. D '06  
Corpl. Co. D '05-'06; Sec. "Senior Mechanics";  
Soph. Foot-ball Team '04; Junior Foot-ball  
Team '05.

Age, 21 years; height, 5 ft., 11 1-2 in.; weight,  
160 lbs.

Call him Mr. W. G. Pittman, except when meal time  
comes; then "Pit" will do. He thinks he has more ex-  
perience than the rest of the world,—been operated on  
for appendicitis, you know, but he's welcome to the  
honor. "Pit" is another big mistake; he would have  
made the finest lawyer that ever happened, especially if  
the word is spelled I-I-a-r. He is a man with whom  
booze, tobacco, and girls cut no "figger."

*Winslow Gerald Pitman*

"Little, but loud."

JAMES KEMP PLUMMER,

MIDDLEBURG, N. C.

*Chemistry.*

"Senior Private."

Age, 20 years; height, 5 ft., 6 1-2 in.; weight,  
140 lbs.

A Bull Senior Chemist. Never known to go calling,  
but is always on the lookout for "Kibo." Has been to  
Richmond, and considers it a very beautiful and inter-  
esting town. Is in his seventh heaven when a "Bull  
Yield" comes his way.

*James Kemp Plummer*

"I am one of the gentle ones that will use the Devil himself with courtesy."

LEON JACOB SCHWAB,

GOLDSBORO, N. C.

*Civil Engineering.*

Age, 20 years; height, 5 ft., 5 1-2 in.; weight, 135 lbs.

"Squab" is most too old for a stew, but he will do. He will be compelled to undergo a lengthening process before he can see through a transit. We hope that he thinks very often, for he says little.

*L. J. Schwab.*

"An honest man is able to speak for himself."

JOHN OSCAR SHUFORD, S. N.,

GASTONIA, N. C.

*Electrical Engineering.*

E. E. Society; German Club; Varsity Foot-ball '06; Glee Club; second bass in '07 Quartet; Varsity Base-ball Team '06-'07; Pres. Junior Class '05-'06; Sergt. Co. D '05-'06; coach of Class Foot-ball Team '05; substitute Varsity Football '05; Baseball Team '04; Corp. Co. D '04-'05; Scrub Football Team '04; Y. M. C. A.

Age, 22; height, 6 ft.; weight, 175 lbs.

Known by his classmates as the man who does many things, J. Oscar is an "all-round" athlete, as he has helped the College to win many victories in baseball and football. Better still, he is an up-to-date electrical engineer, and lucky will be the electric company that secures his services as president.

*J. Oscar Shuford.*

*W C Staples*

"Take counsel of some wiser head."

WILLIAM CRAWFORD STAPLES, K. S.,

REIDSVILLE, N. C.

*Textile Engineering.*

Freshman Year: Capt. Class Base-ball Team; Class Foot-ball Team; Scrub B. B. Team. Sophomore year: 3rd Corpl. Co. B; Capt. Class Foot-ball Team; Varsity Base-ball Team; Coach Class Base-ball Team; Sec. of Class. Junior year: 3rd Sergt. Co. E; Class Football Team; Varsity Base-ball Team. Senior Class: Varsity Base-ball Team; Cerman Club; S. E. C.

Age, 21 years; height, 5 ft., 7 in.; weight, 145 lbs.

Ugh huh! this is he. Though he doesn't look wise, he is, really. He sauntered up on the campus a few years ago with the avowed intention of becoming an electrical engineer, but you know the minds of great men sometimes change. In the textile profession we notice he is taking a great deal of interest. His avocation is base-ball, and he plays a good game. Quick and impulsive at all things.

"The truly great are always modest."

VANCE SYKES,

EFLAND, N. C.

*Civil Engineering.*

Leazar Literary Society; Civil Engineering Society; Y. M. C. A.; Marshal Inter-Society Debate '06; Chaplain Leazar Literary Society '06-'07; Class Sec. '05-'06; Varsity Foot-ball Team '04-'05-'06.

Age, 25 years; height, 6 ft.; weight, 106 lbs.

Vance is still single, but who knows how long? 'Tis true, he is a good, stout man, but somehow or other he just can't stay on examination four whole hours. Garner is his spiritual adviser.

*Vance Sykes*

"I would my means were greater, and my  
waist slenderer."

LUTHER RUSSELL TILLET,

COROLLA, N. C.

*Civil Engineering.*

Pres. first Inter-Society Debate '06; Pres. P. L. S. '07; Vice-Pres. P. L. S. '05; Critic same '06; Marshal Debate '04; Class Foot-ball Team '03; Capt. Scrub Foot-ball Team '04; Capt. Class Foot-ball Team '05; Treas. Senior Class; Inter-Society Declamatory Contest '06; Inter-Society Debate '07.

Age, 24 years; height, 5 ft., 8 in.; weight, 175 lbs.

"Life is so short and uncertain!" "Toby, you are a big fool!" "We have just simply got to get that Honor System down pat to-day!" He had a girl once, but, alas! the coin was tossed and "Skillet" lost.

*L. R. Tillet*

"Upon what meat doth this our Caesar feed that  
he is grown so great?"

WILLIAM BROOKS TRUITT,

GREENSBORO, N. C.

*Mechanical Engineering.*

Major Battalion '06-'07; Battalion Sergeant-Major '06; Corpl. Co. A '05; Triangular Debate '07; Pres. Leazar Society '06; won medal declaimer's contest '06; Chief Marshal Debate '05; Editor-in-Chief Agromeck '07; Editor Red and White '06-'07; Track Team '05; Class Poet '04-'05-'06; honors in scholarship '04-'05-'06; Glee Club '06-'07; Guilford Club '06-'07; Y. M. C. A. Age, 21; height, 6 ft.; weight, 158 lbs.

By the way! here is the Corliss engine maker. But just call him "Bill," or "Rabbit,"—either will do. He is another man who has been held back in this world by having started wrong, for it can be proven that "Rabbit" should have been a missionary, because any man with a hexagonal shaped head is the man for the heathen.

*W. B. Truitt*

"I love thy fondness for hot air."

JOHN EDWIN TURLINGTON,

CLINTON, N. C.

*Agriculture.*

Y. M. C. A.; Leazar Literary Society; Biological Club; Rural Science Club; charter member Biag. Society; winner first prize Biological Club '05; Pres. same '06-'07; Pres. Rural Science Club '06; Treas. L. L. S. '06; Censor of same '04 and '06; Chairman of Y. M. C. A. Membership Committee '06-'07.

Age, 22 years; height, 5 ft., 7 in.; weight, 140 lbs.

This lad's calling seems not to have been specialized. We can't tell whether he is going to be a debater, a lecturer at Baptist University, a telephone operator, or whether he is going to return and measure the depth of water in the huckleberry ponds of the "big blues." With all these ideas in his head, he still has the qualities of a man.

*John E. Turlington,*

"A man who knows how and when to study."

EDMUND FARRISS WARD, K. S., A. Z.,

LUMBERTON, N. C.

*Agriculture.*

Entered Junior Class '05; Editor Agromeck; Scientific Editor Red and White '06-'07; Manager Varsity Football Team '06; Marshal Commencement '06; Glee Club '05-'07; Pres. Glee Club '06-'07; Biag. Society; Biological Club; Rural Science Club; Tenerian Literary Society; Thalerian German Club; Y. M. C. A.

Age, 24 years; height, 5 ft., 9 1-2 in.; weight, 158 lbs.

Let us introduce you to this dark-eyed boy from Robeson County. He is an active member of the Glee Club, can sing beautifully, and is always at the regular german when the roll is called. Somehow, he is very popular with the girls, and never has to study except when examinations come round. Then he draws the curtain about him, lives a secluded life, crams terms in days, and makes his final mark.

*Ed. F. Ward*

"Stuffed with all honorable virtues."

LINDSAY MARADE WEAVER.

LEXINGTON, N. C.

*Mechanical Engineering.*

1st Lieut. Co. B '06-'07; Sergt. Co. A '06; Corp'l. Co. C '05; Vice-Pres. "Senior Mechanicals"; Capt. Class Base-ball Team '05.

Age, 21; height, 6 ft.; weight, 160 lbs.

Lindsay M. Weaver, better known as "Bench" Weaver, is the pride of the M. E. division of the '07 class. His affinity for analytics and calculus is something marvelous, and perhaps is due somewhat to his constant association with "Leander" and "Bully" Mills. He delights in throwing water on the Major when the Major is asleep. In spite of all these faults he is an all-round good fellow.

P. S.—He has never been known to speak to a young lady.

*L. M. Weaver*

"If I do grow great, I'll grow less."

JOHN JACKSON WELLS.

ELM CITY, N. C.

*Civil Engineering.*

Entered Sophomore Class; Class Foot-ball Team '04-'05; Merriman Society of Civil Engineers.

Age, 20 years; height, 5 ft., 8 1-2 in.; weight, 190 lbs.

With due apologies to "Bruno," we now present to you "Tubby." This wise and learned old man drifted among us from U. N. C., and entered our class just one year late. We hardly see how he has gotten through, but we have all grades of confidence in a man that can eat as much as he does and still survive—but 200 pounds is not much for a man 5 feet.

*John Jackson Wells*

"He never broke any man's head but his own,  
and that was against a post."

DAVID LYNDON WHITE.

*Agriculture.*

Librarian P. L. S. '04; Marshal P. L. S. Debate '04; Associate Editor Agr. Education '05-'06; elected Reviewing Editor Agr. Education '06-'07; Class Foot-ball Team '04-'05; Varsity Foot-ball Team '05-'06; Cor. Sec. Rural Science Club '06; Rural Science Club; Biological Club; Pullen Literary Society; charter member of Randolph County Club; Vice-Pres. Randolph Club; Y. M. C. A.

Age, 22 years; height, 5 ft., 10 1-2 in.; weight, 180 lbs.

Who can guess the outcome of this man, who likes Latin and hates to stuff his head with Math? He realizes the pleasure that abounds in nature, and has decided that sowing seed and reaping the harvest is the greatest profession man can follow. His love for the fair sex and the pleasure he finds in late napping will soon force him to simple life.

*D L White*

"Thy face is thy fortune."

CECIL BERNARD WHITEHURST.

BEAUFORT, N. C.

*Electrical Engineering.*

2nd Lieut. Co. A '06-'07; Color Sergt. '05-'06; Corpl. Co. C '04-'05; Class Foot-ball Team '04-'05; Class Base-ball Team '05-'06; Capt. Class Base-ball Team '06; Varsity Foot-ball Team '06; member Electrical Society; Electrical Engineers; 1st Tenor '07 Quartette; Class Prophet.

Age, 20 years; height, 6 ft., 1-2 in.; weight, 175 lbs.

Hard to learn, but after you do learn him, you are glad to have had the pleasure. He is exceedingly fond of his pet Prof. who teaches Electrical Laboratory, and next to his fondness for him comes the pleasures derived from breaking nose-guards and women's hearts. Is a prophet of some note, as his work will show.

*Cecil B. Whitehurst*

"None knew thee but to love thee,  
None named thee but to praise."

ARTHUR JOHN WILSON, B. H. O.,

KNOXVILLE, ILL.

*Chemistry.*

Entered Junior Class; Instructor in Chemistry '05-'06-'07; Varsity Foot-ball '04-'05-'06; Capt. of Varsity Team '06; Varsity Track Team '05-'06-'07; Capt. of Track Team '06-'07; Faculty Base-ball Team '06; Liebig Chem. Society '04-'05; Berzelius Chemical Society '05-'06-'07; German Club; member of Faculty Advisory Committee on Athletics; President of Athletic Association '07.

Age, 23; height, 6 ft., 1 1-2 in.; weight, 186 lbs.

Is called "Babe," but is a "Bull" at everything he takes up. Besides being the greatest athlete in the South, Babe is "some few of a chemist," and has quite a rep. as a "cow-punching" lecturer. Wilson is one of those fellows that you can't help liking, and it pains us very much to announce his engagement to a former ballet dancer, Miss Si. Perkins, of Caraleigh.

*A. J. Wilson.*

"He knoweth best, who seeth best,  
All things, both great and small."

NELSON HALL TATE.

LITTLETON, N. C.

*Mechanical Engineering.*

Entered Junior Class; Exchange Editor Red and White '05-'06; Editor-in-Chief '06-'07 (resigned on account of leaving College); Editor Agromeck; member Leazar Literary Society; Y. M. C. A.; Scrub Base-ball Team '05-'06; Substitute Junior Foot-ball Team '05-'06.

Age, 26 years; height, 6 ft.; weight, 166 lbs.

A new variety of the tuber family, but a right good "Tater" for all that. He amused himself while in College by working the "Mechanical Bunch" to death, trying to keep pace with him. Say! but he and "Rabbit" were a team (right), so long as crockery was not indulged in too freely. Our only regret is that Tate was not in the "push" when the sheep-kins came 'round.

*N. H. Tate.*

"His words are bonds, his oaths are oracles,  
His love sincere, his thoughts immaculate."

JAMES BORDEN LYNCH, K. Σ.

WILMINGTON, N. C.

*Civil Engineering.*

Sergeant Major '05-'06; 1st Corpl. Co. A '04-'05; Marshal Commencement '04-'05; Pres. Freshman Class '03-'04; Artist Club; German Club; Mgr. Class Base-ball Team '04-'05; Capt. Midnight Brigade '04-'05; left College in Junior year.

Here is the natural-born artist of our number. His signature, "J. B. Lynch," can be found if you but look. His chief delight was in distributing "Baby Elite." When in good spirits he wears the smile that won't come off, and can out-talk even a woman.

*James B. Lynch*

## Farewell

And now the time has come when we must part,  
When we our various paths must tread;  
Must leave our Alma Mater unforgot,  
Must number all these days as past and dead.

These days, the memory of whose hours will stay  
Locked in our hearts' remotest cell;  
Whose pleasures and whose trials to us remain  
As jewels bright,—their value none can tell.

A sadness steals upon me as I write,  
For I must also leave thee now,  
Oh A. and M. ! my A. and M. ! my love !  
To me there is no other good as thou.

'Tis well we cannot see our Future clear ;  
'Tis well we do not know the pain,  
Nor e'en the joy that days to come will bring.  
Our vision cannot see what they contain.

But dreams of fairest days confront us now :  
The spirit of determined youth we hold ;  
And grander things we almost seem to grasp,  
That glitter as the purest gold.

We go, and hope always joy and peace,  
And that success may with you dwell :  
And now, although 'tis hard, 'tis sad to say,  
We must: "Old A. and M., Farewell!"

A GRADUATE'S DREAM

## Class Prophecies

**I**T was in the year 1927 that, as I sat in my vacation home in the mountains, thinking over my college days, and wondering the whereabouts of my old classmates, I suddenly, as though automatically, fell asleep. There came a touch on my arm and a voice saying: "Co-co-me with me, o-old boy, and take a p-p-p-ee-p at my new machine." It was Bully Jones. I was so glad to see him, and to learn that he had perfected a machine that would beyond doubt be a successful one. He led the way; I did as he bade, and followed.

The great mountain rose swelling against the western sky, and its purple mass was lined against the evening glow. On one of its slopes nestled the home, more indicated by the thin line of smoke which rose straight through the still air. A human habitation gave the note of personal interest necessary to relieve the loneliness of savage nature. Glimpses of a rocky path leading to this home among the clouds showed that human hearts beat, and glad feet hastened to the goal of home and loving welcome. We climbed the path and were soon on the spot, which was an ideal home for an imaginative mind.

He led me into his laboratory, a large open room strewn with electrical apparatus, and there in the center of the floor I saw his machine,—an air-ship. It was at once rolled out on the lawn in front, and when everything was ready I heard the command—"A-l! a-board!" Once inside and seated, we began to rise; higher and higher we went until the air became very light and difficult to breathe, and the earth below looked one dim mass. There was a broad smile on Bully's face when presently he said: "D-d-on't be s-cared, for you are near-nearer heaven than you-you'll ever be a-gain." He gave me a telescope and requested that I take a look around for the boys. The glass was a wonderful instrument and its make was known to no one else. It brought everything from the Atlantic to the Pacific under my eye. I looked all around me; I saw them; their history was plain.

BATTIE,—"Reek" has settled in Punta Gorda, Fla., and as city engineer is very comfortably situated. His work as engineer is simply a pastime, for in spite of his music he likes engineering as a remembrance of A. and M. The "Crackers" are foolish about their Music Director.

BIVENS.—Electricity was not his choice after leaving College; but he had a great affinity for the place where he left those fingers. He is back to his saw-mill, the home of his youth. 'Tis now The Goodman Lumber Company. Within a short walk of the mill lives the happy little family of four, whom we are pleased to know as Mr. and Mrs. Joe Bivens and Mary and Little Joe.

BRYAN.—Well, my! isn't that great? Carney has reached it at last. I remember of often hearing him speak of wanting to be exactly where he is now. There he sits in his private office, reading the morning paper, as though he had nothing else to do. Lucky old fellow! but I suppose he has had a hard time reaching it. He is President of the Ontario Power Company of Niagara Falls, N. Y. His wife is not with him now. I wonder where . . . Oh! there she is in Washington, N. C., v'sting her relatives and many friends.

CARLETON.—Poor fellow, he has been up against it, but he is making a pretty good show now. His first work was too much of an undertaking, viz., the Western North Carolina Power Company at Wilkesboro; and it fell through, leaving him in very bad circumstances. His time was too much occupied in performance of his social functions—he had so many queenly admirers; but they all lost confidence in him when his business failed. He had a strong determination to gain a "rep." when he appeared in the Hippodrome as the tenor soloist. He is now with the General Electric Company, and has by steady work gained the salary of 17 t-2 cents per hour. Who knows but that some day he will be city electrician for Boomer.

CARTER.—There's Bob back at Lenoir and in charge of the lighting plant. The General Electric Company was not big enough to hold him, (or the salary too small). He is back in the mountains where he can, at leisure times and as in his boyhood days, yoke two young bulls, tie their tails together, set fire to the knot, and see them go.

DAWSON.—His first job with the Cora Cotton Mills of King's Mountain, N. C., was a very promising one; but the place was too slow for him, and he went North. He is now spending a ten-day vacation at Grifton, given him by the Wood Worsted Mill of Lawrence, Massachusetts.

EATON.—He has settled down on a farm, near Farmington, which he inherited from his mother-in-law. He has for several years served the people of his county very faithfully. Two years after graduation he was sent to the State Legislature; was for several terms Sheriff; was once Clerk of the Superior Court, and is now a Justice of the Peace. He first learned to love law under Dr. Winston at A. and M.

ELDRIDGE.—He is now Assistant Professor of Civil Engineering at his Alma Mater. He has been a great promoter of railroad work, once being consulting engineer of two roads. But he is a Y. M. C. A. man and will not be selfish. He says: "When a man has learned it all, it is selfishness in him to keep it for himself; he should teach." His work in the College is very satisfactory to the faculty and trustees, but the boys are not in love with it.

EVERETT.—Soon after graduation he married a young lady's farm—Oh, well, a very nice woman, too, but the woman was a minor part. He is now supervising the farm, but his time is mostly occupied by writing sermons and traveling over his circuit. He is in the Methodist Conference, and his circuit has four churches, he being to each every fourth Sunday.

FERGUSON and FOWLER.—Now, who would have ever thought these two fellows would have stuck together as they have? All of their classmates naturally believed it would be John and his Uncle Carleton. But we can't always tell. They left College together and went to work with the General Electric Company, and have been there ever since. They have been sent out for construction work several times, and always together. They both now hold very responsible and paying positions.

GARNER.—After holding a few positions of little consequence in civil engineering work in North Carolina, he accepted a position at Panama. After working there eighteen months, he took a vacation, spending several days of it at Beaufort, N. C. While there he became interested in the subject which interested all Beaufortonians at that time, and wrote an article on the Construction of the Inland Water Route from Norfolk to Beaufort. It attracted much attention, and the following year Congress appropriated money for this construction. The contract was given, and the contracting company made Mr. Garner chief of this work. It has been completed, and the name of C. L. Garner will last through all ages of Beaufort. He is now working for the same company.

GILL.—He sits in his study in front of the big writing desk, upon which are several stacks of written pages. Several loose, separate pages are scattered about, and upon one words of lyrical sweetness are slowly added. The poet dreams—he writes again—and the last is complete. The pages are gathered and a volume made that takes the world by storm. All poetry is touched upon, from the simple lyric to the epic narrative.

GILBERT.—Grandpa—not yet, but soon:—a papa by a big majority. His eldest boy of 17 years holds a very responsible position, for one so young, in the cotton mill of which his father owns controlling interest. The father's daily advice to young Rogers is: "Son, avoid close companionship with our mill girls."

GRAVES.—Lucky fellow—bluff goes. He has a comfortable position, and somebody to do the work. In the city of Bluefield, W. Va., he lives almost as a millionaire. Of course he is not, but with what he has he makes an awful big show. Almost daily an automobile stops at the Bluefield Power Station and "Pot" is seen strutting in;—he examines, questions, gives orders, and is gone again. At the auto's next stop someone is waiting.—Mrs. Graves, before leaving for the afternoon ride, orders the nurse to let Little Robert have a good, long sleep.

HARDESTY.—As steward at the North Carolina Normal School at Greensboro, he endeavors to be happy. He has, several years ago, been very seriously disappointed in love by the fairest of Clayton, and has therefore a broken heart. Unlike many of his kind that, on account of their disappointment, take to hard drink and abandon women and society, he has settled and lives among scores of the fair sex, and tries to forget the one that so bitterly wronged him.

HARDIE.—He is beyond the strength of the glass. Undoubtedly he serves his country of Scotland as an engineer, establishing American systems.

HEMPHILL.—Since his very successful year as Manager of the College baseball team, his sole object has been to manage baseball. He is known throughout the South as its greatest baseball enthusiast and promotor. His team this year, the Atlanta Stars, have a good record, and there is no doubt in Jok's mind that they will win out. Managers are generally sly ducks, but none can surpass Jok in—well, that bad habit that made him famous at A. & M.

HERRING.—Two years after graduation at A. and M. found him a graduate in Veterinary Medicine from the Kansas City Veterinary College, this being the science he had followed closely at A. and M. Knowing that this science was not developed in North Carolina as it should be, he returned to his native State to put into practice the immense store of knowledge which he had gained in this subject. Finding it necessary to have means to push such a business at the beginning, he at once thought of how he made ready cash at College, and began cutting hair. His profession as veterinarian has amounted to very little, but he is now the most up-to-date Tonsorial Artist in Clinton. Sad to say, his income has been too limited to support a "better half," or rather it is what his long-loved thought when she turned him down.

HENSHAW.—As city engineer of Winston-Salem he is contented. He is a bachelor and still a very sporty flirt, although his years number two score and seven and his hair is showing a tint of silvery gray. Not a single man because he has to be, nor because his chances to marry have been rare, but simply because he wants to be; he thinks it so much more fun. At present a certain widow lady of less than half his own age is receiving the greater part of his well-trained affections.

HOLT.—Bill is living in Remford, and besides his work in the cotton industry, has sundry other duties. His pastor, Rev. Montague, has at last succeeded in getting his old chum interested in church work, and has effected his election as choir director. Besides this, he has tried to draw Bill from his bachelor ways, but in vain.

JONES, A. C.—At Ft. Worth, Ark., there is a small crowd of men and boys gathered around a sick horse, which seems to be on the point of death. They are evidently waiting for some one. There comes, into the lot where the horse lies, an old weather-beaten man whom I am sorry to recognize as my old classmate, A. C. Jones. He is evidently the one expected, and takes charge of the sick at once. The horse is much better and is able to get up and walk around. He collects his fee, which is only two dollars, and makes his way back to his room, which is in the suburbs of the city in a small cottage, where he seems to be the only dweller. He is keeping bachelor hall, but he doesn't seem to be unhappy, so why should we care?

KOONCE.—In Iowa, in the midst of that wonderfully fertile region, there sits on the veranda of a splendid country house, a middle-aged gentleman, whose face, though covered with a luxuriant growth of black beard, seems to have a familiar look. Upon closer inspection our old friend Koonce is recognized. His face wears a contented expression as he surveys his broad, rolling fields, covered with golden seas of grain ready for the harvest. On the lawn in front of the house are playing two beautiful, healthy, happy children, and a smile comes over his face as their childish shouts come floating up to him. It is with a peculiar longing that we observe this domestic scene.

LATTA.—Delicate little fellow, he grows smaller, his weight now being 90 and 8. He has never left Raleigh, because he has been afraid; he has never been married, because none his size suits his taste. He lives an easy life, works very seldom because it doesn't agree with him; but the ladies all admire him because he has no choice.

LOUGEE.—He is very changeable, and has never decided whether he likes chemistry or bookkeeping, although he has tried both several times. He has at last compromised by taking a hand in both, and is now partner and bookkeeper in the West Raleigh Grocery Company, also is employed in the State Chemical Laboratory.

MCCONNELL.—Rabbit Hash, Ky., has now grown to be a city of particular mention, and to Father Mc, it owes its growth. After five long years of hard work and tedious study of chemical analysis, he discovered the ingredients that, when properly united, produce the most delicious, invigorating and intoxicating drink

ever known to man—Ky. M.M.M., which has made Rabbit Hash famous. No one knows what M.M.M. really is, but we do know it means a drunk when we get on the outside of it.

MCNAIRY.—After an arduous struggle to attain merits as a railroad engineer, he has at last succeeded, and is now chief of the Elevated Railway in promotion at Greensboro. However, his literary appetency has not faded, and he is editor of the *Daily Autocrat*. If you do not subscribe or contribute articles, read the editorials and you will do so at once. Let's not bother him further, because he is sleepy.

MEADOR.—If "she" could see Me-dor now, wouldn't he make us laugh? Neither peptonoid nor breakfast food can make him fat, but 'tis dope of any and every description from Ky. M.M.M. to a wad of opium that keeps him with us. But, in spite of this failure, he very faithfully and luxuriantly supports a man-size family.

MICHAEL.—Who would have ever thought it? Why, he has married that bonnie lassie we knew as "Ph." Lucky grab for him; that woman knows economy from start to finish. Mike used to be such a rounder, noisy, treacherous fellow, and now see how she has taken the life out of him. There would be danger of starvation on that little plantation were it not for her shrewd management. She is the "Boss." Mike—he just does the work.

MIAL.—Ichabod very largely owes his success to the fact that he is not afraid of work. Work doesn't fade him at all; he can lie down beside the hardest kind and sleep as comfortably as beside his life partner. He is now in his wood and coal-yard at work on one of the most difficult problems of the twentieth century—a calculation that involves math-e-matics from Math. himself to his brother John. Problem:—To calculate the consumption of wood and coal per year in the city of Clayton.

MILLS.—There's "Apie," and he is still foolish about his barie. He has not followed his course of engineering, as it involved no music and did not throw him in contact with men of his class. Being conductor of his Dad's railroad, he finds sufficient time and opportunity to put into practice his power as a phrenologist. A ride over the Mills Road is made very enjoyable by the amusements furnished by the conductor. He, with his famous quartette, is known as a second Polk Miller.

MONTAGUE.—Dear old Montie—who ever would have thought such a change could have come about? He is the beloved and contrite pastor of the First Baptist Church at Remford; and just to think, Pinner is there, too, the pillar of his church, the leading deacon, and superintendent of his Sunday School, with Bill

Holt as choir director. It is said that there is nothing new under the sun, but this seems a peculiar case.

MORSON.—He has tried civil engineering and loafing to no avail, but, as to the Race Suicide Question, he just doesn't believe in it, to which you would readily agree could you but have the pleasure of visiting his home. "Toby" has caused his name to be honored throughout the world by his scholarly efforts on his treatise of our duty to our fellow-man, entitled "Help."

OVERTON.—As we see "Shorty," he sits in his cross-roads store, whittling on a white-pine box, with one eye on the knife and the other on every loafer within ten feet of the tobacco-box or sugar-barrel. Everyone knew what his future would be since the time he run the candy stand and so strongly advocated the matching game. No one could beat him then, not excepting Billy, and Shu was a sure victim. Who can doubt that he has Jew blood in him? Those poor farmers sure get skimmed, for he knows how each one stands financially and figures for them. His terms are 50/0 off for cash, and they all innocently think it is 50/0.

PARKER, T. F.—Knowing nothing better to do, he left Raleigh for the wild and wooly West to make his fortune. Taking up a claim for several hundred acres, he built a small cabin, and for five long years he toiled and sweated over the hard adobe soil. He made good his time, but his conscience would not allow him to bring the lady of his choice to this far-away land, so now he is back near his Alma Mater but still more near the Penitentiary, supervising a small truck farm.

PARKER, JIM.—The old fellow has too many bad habits to be considered by the Little Brown Hen. When she first met him it was plain old Jim in charge of the light plant at the Summer School, but now 'tis rough old Jim out West. The question is: "Who did the wrong?" He certainly gave up all and visited her each Thanksgiving Day. The answer can be nothing more than he was wronged by a jealous rival. He lives the lucky-go-easy life in Utah, where he has as many hens as he wants, although they are not Brown.

PARKS.—I am so glad to say that Fred has prospered. He is located in Charlotte, where he has an office in the most prominent business section of the city. During office hours he manages the affairs of the Yadkin Power Company, of which he is President. But he himself is most efficiently managed at all times by Fred, Jr., a little tyrant of six summers who is idolized by his "Daddy." He has a splendid country home three miles out of town, which is presided over by one who, as Fred, says, is "The One Woman." No doubt he is happy.

PASCHAL.—He has labored much between the plow-handles and jerking a bell-cord over a hard tail, but with little financial avail. Having supplied his whole

community with books of every kind, he wept for more victims, and wondered were there any more like those about him. These adverse circumstances set him to thinking more seriously, and now he has perfected a pruning apparatus that has brought him both money and fame.

PINXER.—Guy will not be separated from his old chum, Montie, and has followed him even till now. The result has been mutual benefit, for having been drawn into active church work, the younger has quit his sporting ways, and is now superintendent of the Sunday School and head deacon in the church. His philanthropy is widely known.

PITMAN.—He sleeps now, to rise at two in the morning and start on his run out of Lambertton for Boardman, as engineer on a log train. He is a learned engineer, but is given a short run to make sure he will be awake. His book entitled "Sleep," teaching that sleep is most essential to life, also giving mechanical means of sleeping, has made its author a "rep." throughout Robeson County.

PLUMMER.—As Assistant State Chemist "Kibo" prospered, but it soon grew monotonous and he began a public career. Having a head full of reactions and an affinity for popularity, he entered the dark and dismal path of politics. He was soon in the State Senate, and did a great deal for prohibition, which very much pleased his people of Henderson. He is now Mayor of that city.

SCHWAB.—On Main Street in Goldsboro, and upon the spot where the passenger depot used to be, stands one of the most magnificent buildings in the South—the clothing establishment of L. Jacob Schwab. Leosie liked engineering, and followed it for awhile, but his conscience hurt him because he felt that he was sinning against his people to do anything but sell goods.

SHUFORD.—A passing glance down Main Street of Gastonia is sufficient to tell his history. The first thing that attracts the eye is a sign, showing by appearing and disappearing electric lights, "Gastonia Electric Supply Company—J. Oscar Shuford, Prop." Another glance up Franklin Avenue, and there is the home; and I'm glad to say that, in that home is the long-talked-about queen and several others that need no mention.

STAPLES.—Although he holds a very high and dignified position, he is until yet known as "Gilligan." He is still a strong advocate of baseball, and a few days ago the cotton-mill president astonished the whole town of Warpyville by his sensational plays with his mill team for the Cotton Belt championship.

SYKES.—With his constant and diligent perseverance he has risen to and filled the position of City Engineer of Fernalton, and during the time has accumulated a handsome sum of money; but don't say civil engineering to him now, for

he has retired to a country home in Orange County. His greatest pleasure is farming, and he rejoices in hearing some one say, "Papa, come to dinner." He loves his home, but if you want him to upset, you just say dinner.

TILLET.—Luther for some time after graduation achieved much success as chief engineer for the W. C. T. U. Co., of Coinjock, N. C. These many honors and slow life became tiresome to him, and he has now turned to the more exciting field of poultry and stock raising, his specialty being marsh ponies. The beautiful little animals bring up sweet memories of the past, and afford a means of locomotion for the constantly increasing flock of little Tilletts. We are glad to know that married life has so calmed his spirit that, even when mistaken for Tubby or T3 he only gives vent to a sigh.

TRUITT.—Rabbit is still from Missouri, but that doesn't cut any ice, as he is now holding a responsible position in his native town. He has the happy faculty of mixing up poetry, machines, and political economy, and is still able to draw pay at the end of the month. A strapping youth that comes to the call of "Bill Jr." is the light of the Major's heart. Young Bill is being brought up along purely scientific lines, and, in fact, his Dad often uses his "Kent" on the more serious problems of child raising.

TURLINGTON.—A farmer! Yes, the height of his ambition. He is now putting into practice what he learned in four long years about Agr. Eng. All the Sampson County people think he is a scientific farmer, and are following the example set them. After a short but tiresome procedure, he gained that which he most anticipated—the hand of his little country Jane.

WARD.—Down in Robeson County we find Ward, the ideal farmer of that section, sitting on a broad front porch of his single-story dwelling, discussing with his tenants the subjects of farming, hard times, religion and politics. Why he goes barefooted we can give but one reason; that is, he fears waking the kid that sleeps in the rear end of the hallway. His tenants seem to find much pleasure in discussing farming and hard times with the'r boss man, religion with their Sunday School superintendent, and politics with their nominee for the Legislature—all of which they find in Ward.

WEAVER.—Lindsay has a position with the American Locomotive Works that will support a good-sized family; but his poor wife, like all others, has her troubles. Her husband will keep a supply of pet hound pups that must share equal rights in the household with the rest of the family. Lindsay is annoyed a great deal by having to run back and forth to his work to attend to some little trouble his pets have got into at the hands of Dame Van Weaver.

WELLS.—From the arid hills of Mexico to the Arctic shores of Canada he is no longer known as "Tubby," but as J. J. Wells, the Director of Reinforced Concrete Structure. He is of late contemplating giving up this and accepting a position on the stage, as his winning ways and handsome mug will attract money.

WHITE.—Alas! poor Dave has spent the spring of his life trying to win the hand of some of the fairer sex. Better judgment has now turned his way, and we find him driving a little cart up and down the streets of Method, selling a few fine specimens of watermelons which he has spent much time in getting to perfection.

WILSON.—You wouldn't know "Babe" if you were to see him now. He is of course tall, but that only adds to the effect of that "lean and hungry look" which is usually to be seen on his face. But this is, no doubt, only the effect of hard work, and due to the fact that he no longer keeps in training as of yore. "Babe" returned to Raleigh about five years ago to take the chair of chemistry, which was vacated by the retirement of Professor Withers. He is chairman of the Faculty Athletic Committee, and his sole aim in life seems to be to get out a team that will defeat the U. N. C. He has married since returning to Raleigh, and has evidently settled down to a life of usefulness.

\* \* \* \* \*

I heard a faint laugh and felt a pressure on my knee, when then a little fellow called, "Papa." I fancied I had been dreaming.

---

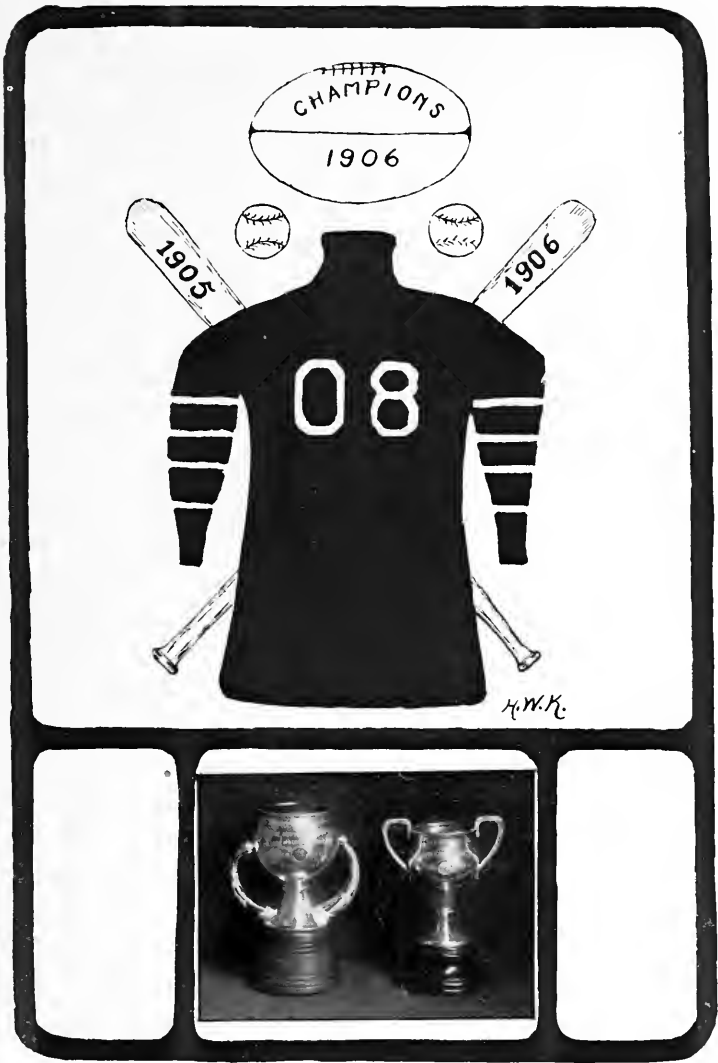

### A TOAST TO '07s.

Here's to those of '07!

May they succeed, every one,

And their souls depart to Heaven

When their work on Earth is done.

## Junior History

\* \*

**H**OW the time has flown! Perhaps it is because it has been pleasantly spent, for never in my short life have I spent my time more pleasantly than I have in my stay here at College.

As I sit here trying to compose this work, I realize that writing a Junior history is a thing "not lightly to be entered upon," but is to be worked out "with fear and trembling," for the Junior cannot plead the Freshman's greenness nor the Sophomore's braggadocio, but must begin to stand on his own merit.

\* \* \* \* \*

Some three years ago there arrived on the College campus a hundred or more fellows who were shortly afterwards to be organized into the Class of '08, a crowd whose temperament might be defined as "emerald," and with a persistent desire to know, that has characterized the class in all its work.

We were very attentively received, as befitted our station. Everyone seemed anxious to do something for us, especially the Sophs. Probably so much attention went to our heads and gave us the reputation for freshness which we had.

However, we survived the opening scenes of college life, and under the auspices of the Commandant organized our class in November. We entered the race for the football cup, and had we not been Freshmen, hardly knowing the limit of our powers, we would have come out victorious.

Passing over examinations, which is always an unpleasant subject, we come to baseball. Here our class had the distinction of furnishing a man for the Varsity, who played an errorless game. Varsity ball being over, class teams were organized, and '08 began her record-breaking career by defeating the Sophs. 6-2. Naturally we were very proud of this, and did not let any grass grow under our feet in telling the world about it.

Baseball over, there came exams, and although some failed to make the much-coveted sixty, there were but few who could not return to College on account of their studies.

It is a perplexing question as to when a Freshman becomes a Sophomore. In the spring he is lonely, timid, ignorant, and almost afraid of his own shadow. In the fall he comes back proud and naughty, bursting with knowledge which he would impart to others and despising the Freshmen as he was once. Having been well trained by the Sophomores who preceded us, we were resolved that "our" Freshmen should have the results of our experiences and should lose none of the training which transforms a self-important Freshman into a well-bred college man. If a man could spend no longer at college, he would be well repaid in being a Freshman.

Many of our boys did not return to College for various reasons; but those who were left began more and more to feel the binding force of class and college spirit.

and to feel that we were all brothers, banded together to help each other as best we could.

For the football team of '05 we furnished a man who was easily a star and whom we are sorry to lose as a member of our class. A number of our boys did not return after Christmas, but those of us who were here went bravely to work, and went far beyond the marks in the books set by our predecessors. In baseball we again won the class championship by defeating the Juniors and Freshmen in turn. This was the first time in the history of class athletics at this College that any but the Freshman team had won in baseball.

\* \* \* \* \*

Vacation is past, and we are back as Juniors. According to the inexorable law of the "survival of the fittest," we have not as many men as we once had, but the coming in of fresh upper classmen has the effect of causing us to feel our loss less keenly.

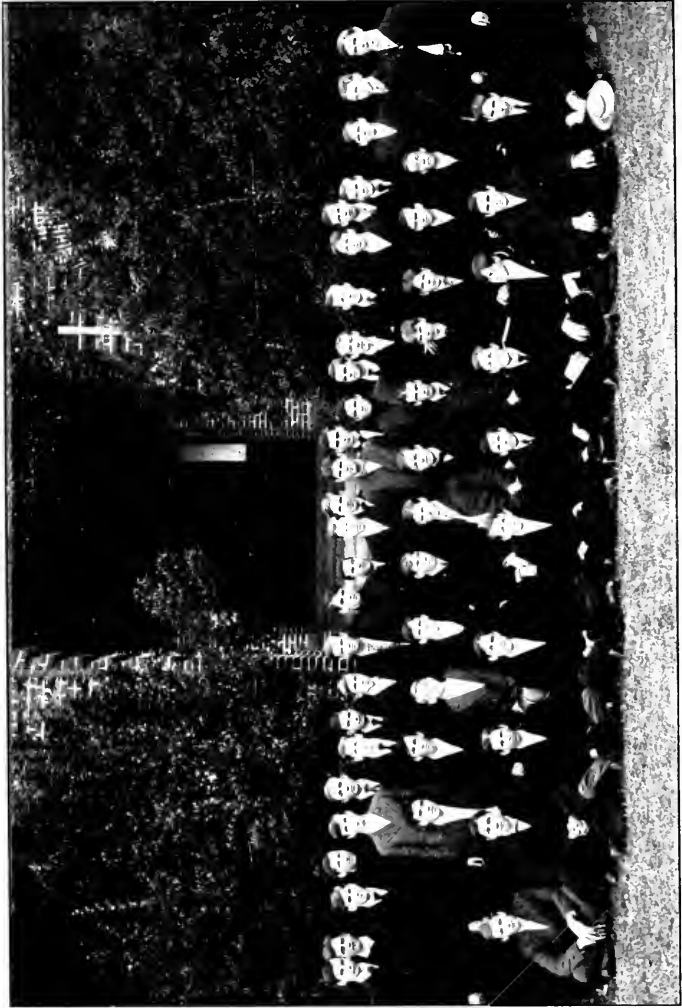

This year on entering College we were very much delighted to hear that many of the petty restrictions which had been in force in the College had been repealed, and that the uniform would no longer be worn except on drill. These improvements do much toward removing the friction between the faculty and student body.

The Class of '08 had right much to do with the making of the '06 football team, furnishing Beebe, Eskridge, Stroud, and Temple, who with the others made a team that was beaten only once and scored on only twice.

After the Varsity season was over, the class teams were organized, and this time our class attained its crowning ambition,—that of winning the football cup. The Sophs. were defeated 6-0 and the Freshmen 5-0. After the last game the team was given a banquet at Giersch's by the class in gratefulness for their successes.

It is now only a few months until we shall have finished our Junior year, and it fills most of us with sadness to think that the end is so near, for we have grown to consider this a second home, and were it not for the "folks" at home and "Her," we should like to stay here all the time. But enough of sad words. We are looking forward to the time when we shall win the baseball cup and celebrate our athletic achievements by a banquet.

## An "Ode" to '09

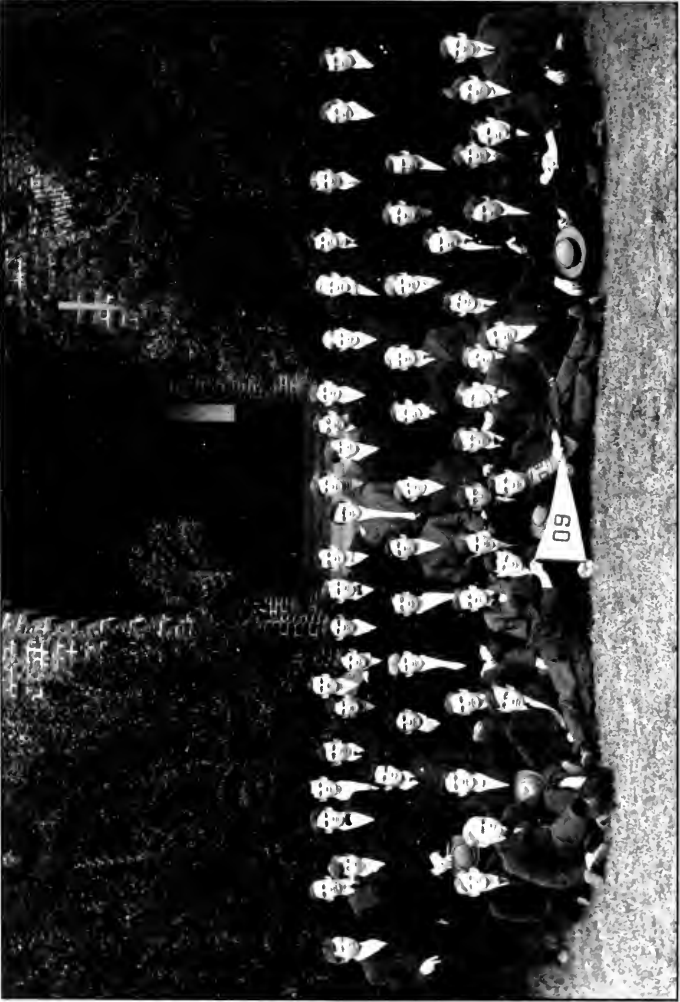

'Tis midnight and I cannot write a line;  
But I must write a poem to-night  
For the Class of "Naughty-Nine."

Oh, summer short  
In heaven that shines,—  
Thy inspiration shed afar,  
And give me several lines!

.....  
.....

'Tis done: this poem  
This poet had to write;  
You bet the class will owe him  
For the sleep he lost to-night!

SOPHOMORE CLASS.

# Sophomore History

## CHAPTER I.

**I**N September of the year nineteen hundred and five, we set sail on the great voyage of college life, to search the pages of text-books for the knowledge there treasured. On this voyage we have had many trials; but with a determination never to surrender, we have made a clean record worthy of mention.

A feeling never to be forgotten crept upon us when we appeared before the President for matriculation. Having matriculated, we were directed to rooms. Scarcely had we entered dream-land for the first time—when we were awakened by a banging on our door and a voice saying, "Open up." We obeyed the command, only to have our color changed either to black or brown.

Despite the suppression attempted by our upper-classmen, we called a class-meeting, and in less than three weeks we had organized the strongest Freshman class that has ever entered A. and M. College. At this meeting officers were elected who served for a term of one month. At the expiration of this time another meeting was called for the purpose of electing officers, and these served throughout the year. We were now in a position to turn our whole attention to our college duties.

The time rolled speedily along for over three months, and then sprang into our way the long-dreaded examinations. Now were trying times for us, but with a resolution never to say, "I have flunked," we set earnestly to work. During the last week of examinations we were informed that the "Sophs" were going to black us again; but, having in us the spirit of the last of the "Naughties," we decided not to be treated in such a manner. We gathered, about seventy-five strong, and barricaded the third floor of the Fourth Dormitory, where we awaited the coming of our enemy. But, strange to say, they did not venture near.

In the spring, baseball was the chief amusement. The class feels very much gratified to know that from it two stars of the team were selected. One of these has a South-wide reputation as a catcher, and the other did excellent work at first base.

After baseball we were again confronted with final examinations. This is a marked epoch in our history, the ending of the Freshman year.

## CHAPTER II.

At last our three months of recreation and pleasure were over, and we entered into this, the most glorious one of our four years. Our hearts were filled with contentment to know that we were Sophomores, and would no longer be despised by upper-classmen who thought themselves too much exalted to associate with us.

Scarcely had we begun our college work when football again demanded our attention. Those of us who did not use our skill on the field, used our voices on the side-lines. The class can boast of the two ends whom we furnished for the Varsity, and six others on the football squad, all of whom have put forth every effort to win for the College a reputation in athletics. Following the Varsity games came the series of class games. In these we did not win, but we gave the winners a hard race. It was not until the latter part of the last half of the second game with us that they were, by luck, enabled to score.

We have advanced a step farther than any Sophomore class has in many years. This step was the abolition of hazing. As a result of this move, more college spirit has been shown, and we are now putting forth every effort to bring the classes closer together and set good examples for those to follow.

The end of our history finds us standing Christmas examinations. We have been noted during our existence for being well organized and doing first-rate work. May we ever continue to grow in quality and be a class renowned in the annals of the College!

LET THE FRESH  
DO YOUR WORK

## Freshman Poem

In the fall of nineteen-six A. D.,  
Our class, a hundred strong,  
Strode up to the door of A. M. C.  
To join its studious throng.

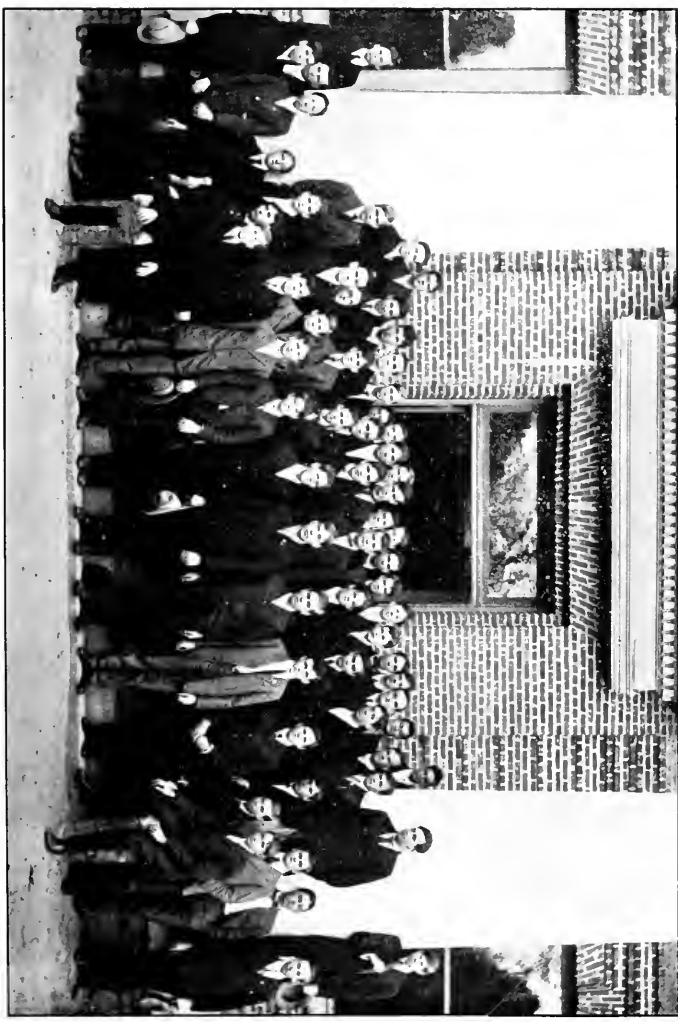

Swiftly the first few days passed by,  
Though they were not serene,  
As some of our number tried to defy  
Those who called us green.

Just as we were getting settled,  
New troubles came our way,  
As with blacking-pot we were nettled  
By the boys in maroon and gray.

But, alas! our first year is ended,  
And we are Fresh, no more;  
So to the Class of Nineteen-eleven  
We open wide our door.

## Freshman History

**A**S we are short-lived, our history is short. Therefore we have little to relate. In the fall of '06 we marched up to the College by a merry tune, depressing as we thought it, but with much enthusiasm for the class of '10. As expected, we had our dreaded midnight visitors, who left us in a deplorable condition. But the Sophomores' triumph was short, as the Faculty quickly suppressed them, and this was a day of joy for the Freshmen.

Seeing the need of hazing being stopped altogether, we pledged ourselves to the faculty not to haze any while we are in connection with the College.

During the month of September we held our first class-meeting, and elected as temporary President, Mr. T. T. Dawson. At another meeting held in October we elected permanent officers.

We were well represented in athletics, having Edwards, Bray, and Spencer on the football squad. In the class football game our men played hard and made the Juniors and Sophs. *play* for the cup. We expect to be well represented in baseball.

The Class of '10 expects to make her record, and let her watchword be "*Progress.*"

STUDY HOUR.

BATTALION

## The Battalion

OUR National Congress, under the Act of July 2, 1862, donating lands and money for the establishment of colleges where the leading object shall be the practical instruction of the industrial classes in agriculture and mechanic arts, provided, that for and in consideration of such donations, a military department shall be maintained in each such college, and that a certain amount of military instruction, both theoretical and practical, shall be assigned students in their regular schedule of duties.

The aforesaid act further provides that, upon proper application, army officers, either active or retired, may be detailed to serve a stated time at such colleges, in the capacity of commandants, for the purpose of imparting a more thorough knowledge of military matters than those usually acquired by State troops.

Under the classification of the War Department, there are to be found four distinct classes of colleges, each differing in the amount of requisite military instruction.

The A. and M. College of North Carolina comes under classification "B"—"Agricultural schools established under the provisions of the Act of Congress of July 2, 1862, and which are required by said act to include military tactics in their curriculum."

The character of instruction in military colleges varies according to the nature of the institution, but all colleges, to which army officers are assigned, must include theoretical and practical instruction in Infantry Drill Regulations, Field Service Regulations, Manual of Guard Duty and Firing Regulations for Small Arms. These to be supplemented, if time permits, by lectures on Army Administration, Organization and Tactics and Security and Information.

In accordance with the foregoing requirements, and at the opening of the 1906-'07 term, September 7, 1906, the students of the College were organized into a battalion comprising five companies and a band, each company having a strength of fifty-five members and the band 26 members, both the companies and the band having the requisite number of officers and non-commissioned officers.

Although now the end of the term is fast approaching, we having passed over a period of nearly ten months, how well it is remembered, the first day the battalion was assembled for purposes of "sizing up" the men, dividing them into companies, announcing the different assignments of officers and non-commissioned officers, and turning over the several organizations to their respective commanders, each of whom realized that it was incumbent upon him to "whip" his proportion of 175 "raw recruits," by sedulous work and unswerving discipline, into well-drilled cadets by October 17, 1906, upon which date our battalion was to drill at the State Fair.

So well was this work performed, and so earnestly did each and every member of the battalion undertake to improve himself, that at the expiration of the five-weeks drill, prior to the Fair, the entire battalion and band compared most favorably with many organizations in the United States Army.

Braving the elements, and in the face of a cold, drizzling rain, the battalion, on October 17, 1906, marched over to the Fair Grounds, and, prior to the competitive drill scheduled, many maneuvers were executed by the entire battalion with force and precision under the command of its efficient Major, W. B. Truitt. After this, each company drilled ten minutes, in competition, executing all the movements in the schools of the company, platoon and manual of arms. After this drill, the judges, Generals Robertson and Macon and Captain Moody, all of the North Carolina State Guard, awarded the prize, a beautiful silk pennant, to the best drilled company, which proved to be Company C, commanded by Captain Guy F. Hinshaw. At all ceremonies this lovely banner is carried with the "Colors" by Company C in recognition of its high standard of drill, and attesting the unceasing efforts of its members to make the company one of the best in the profession of arms.

It is fast becoming a recognized fact that it is the duty of all loyal citizens of the United States to have some knowledge of military work, whether they be called upon or not to defend, under arms, our happy and prosperous land, and to maintain before the world our national rights.

War is very uncertain. No one can tell what the next few years may present to us. It may be an internecine strife between our own citizens, or a bitter war against some pretending world-power endeavoring to invade our territory. Be it one or the other, where are we going to get our properly trained fighting material unless we constantly diffuse military science among the "laborers in our harvests," in order that they may, when the call comes, go into the fields and organize and teach and build up a fighting machine well qualified to hurl back, in retaliation, the "thunderbolts" of the enemy?

It is so gratifying to know that, from colleges such as ours, there can be gathered many young men—the very best material of the country—who, by an all-wise provision, have equipped themselves with that knowledge of the military which prepares them for inestimable service to their country, and which will place them in the front rank in promotion and responsibility as they enter the different vocations of life, be they military or civil pursuits.

The battalion this year is a grand testimonial to the fact that North Carolina can produce and prepare some of the best, if not the best, trained and fighting stock to be found anywhere in the world. It is to be hoped that each succeeding year will show just cause why we should elevate the standard of the military department.

## Alma Mater A. & M.

Words by Albert Edward Escott, '06.

We're the men of A. and M.,  
But they are not all here,  
Sun-kissed Carolina.  
We sing a song of cheer,  
Tar Heel State's a great old State;  
She rambles far and wide,  
From the Blue Ridge in the sky  
To broad Atlantic's tide.

On the Hill we've paced our beat,  
With guns and t'ed feet;  
But on war-path marching,  
Or on enterprises sweet,  
Then with scenes of college days  
The recollection teems,  
And we'll sing of Alma Mater  
In our gladsome dreams.

North Carolina A. and M. College,  
Sons in many climes,  
True to thee and loyal,  
In peace and stirring times,  
Hail the flag of Red and White,  
For a college strong and free—  
Alma Mater, Heaven's blessings  
Always follow thee.

# Departments

## Agricultural Department

\* \*

- CHARLES M. CONNER, B.S.A., B.S. .... *Professor of Agriculture.*  
 TAIT BUTLER, V.S. .... *Professor of Veterinary Science and Zoology.*  
 FRANK LINCOLN STEVENS, M.Sc., Ph.D.,  
     *Professor of Botany and Vegetable Pathology.*  
 WILLIAM NICHOL HUTT, B.S.A. .... *Professor of Horticulture.*  
 BENJAMIN WESLEY KILGORE, M.S. .... *Lecturer on Soils and Fertilizers.*  
 JOHN CHESTER KENDALL, B.S. .... *Assistant Professor of Dairy Husbandry.*  
 GUY ALEXANDER ROBERTS, B.S., D.V.S.,  
     *Assistant Professor of Zoology and Anatomy.*  
 FRANKLIN SHERMAN, B.S.A. .... *Instructor in Entomology.*  
 FRANK REIMER, M.S. .... *Instructor in Horticulture.*  
 ALFRED HENRY THIESSEN, B.S. .... *Instructor in Meteorology.*  
 RUSSEL SAGE WOGLUM, A.B., M.S.A. .... *Instructor in Entomology.*  
 JAMES CLARENCE TEMPLE, B.Agr. .... *Assistant in Bacteriology.*  
 ROBERT SETH CURTIS, B.S. .... *Instructor in Animal Husbandry.*

## A Fantasy

• •

The rivulet babbles and bubbles  
As now on its brink I stand;  
As it breaks on the stony ledges  
And plays with the golden sand.

As it sweeps by the bend but yonder,  
So sweeps the world from me:  
The stormy conflict has vanished,  
To leave my conscience free.

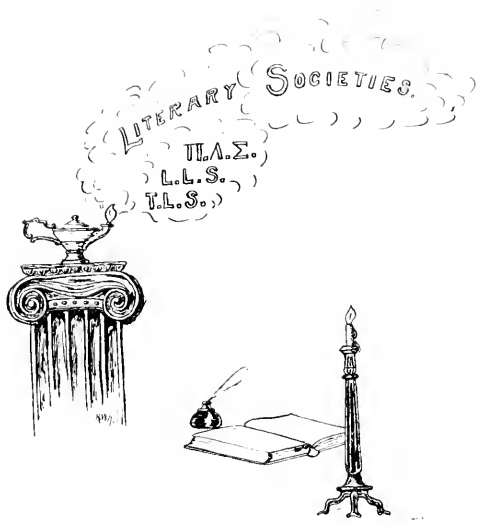

But yet one mad thought haunts me,  
And hovers around me still,  
Which seems to become my ruler,  
To now command my will.

A passionate tumult arises,  
The depths of my soul to stir:  
'Tis a longed-for, ideal image,  
And given me for a spur.

To wake up the slumber'ng spirit,  
That I may wish to earn,—  
To work for a single purpose,  
To face each coming spurn.

Is this the obstinate passion  
That others, too, have sought,  
To some a blessing given,  
Yet war on nations brought?

But the rivulet babbles and bubbles,  
And in the sand I trace  
A word, a name, and a token,  
A memoir of a face.

## The Biag Society

**I**T is seldom that a society is found ready-made; the very best of material requires further attention on the part of older men. It is like a young boy entering college; it must stand many hard knocks, and for the first few years it is very plastic; but the impressions received at this period are apt to be the permanent hall-marks of its future. They will either make or destroy.

It was on January 16, 1906, that a few members of the two upper classes of the Agricultural Course met with, and at the home of, Dr. F. L. Stevens, for the purpose of the organization of such a society as we now have. At this meeting the Society organization was not completed, but on January 23d it was formally inaugurated, and its policies of government established.

Since its organization the whole work of the Bi-Ag has been growing. The Society locally and nationally could not wish to be in better health or in a more prosperous condition. Although it is very young at this writing, the writer feels that he can say that the Bi-Ag is no longer in its knee trousers, but that it has assumed a strong, vivacious form of youth, ready to have and to hold all that comes within its reach.

The field of the Bi-Ag is just as large as the work of our agricultural colleges. As our colleges grow, so will our Society be bound to grow; as our colleges become more useful, so will our Society become more useful. In fact, it is the Society that will help develop our agricultural colleges, and will add dignity, strength, and popularity to our course.

The character of our Society is quite different in some respects from many others; but the writer remembers that there are many societies, and that they stand for nearly as many things. Some stand for a single thing, as athletics, sociality, morality, scholarship, etc., while others try to combine all of the good things in the right proportion, and this we believe to be the best standard.

A Society, after all, is simply a man-building institution, and it is only by giving attention to these various good phases of life that a good, wholesome, sympathetic, all-round man can be developed. If we give undue attention to any one of these phases of life we will get a lop-sided development, and consequently we get either a lop-sided man or woman. Does this mean that individuality is curtailed,—that we are all trying to attain the same ideals in the same way? Not at all; it is simply oneness of aim and purpose, and not oneness of ways and means.

The great value of our Society, and the thing which makes it an honor to be a member of it, rests on the fact that we are not a body of men gotten together merely for social ends, but that we have a ruling purpose—a desire to help one another intellectually and spiritually as well as socially. An ideal Bi-Ag man is a strong man with a noble purpose.

## Why ?

Why do the thoughts of you, into  
My weary soul now steal?  
Why does an image of you appear?  
And why does it seem so real?

Oh! you with the eyes of deepest brown,  
Whose depths a message bear;  
Whose twinkle to the one who sees  
Reveals no doubt nor fear.

And you with the smile you always wear;  
With a laugh of gladsome glee;  
And the joyous, wond'rous way you have  
Of slyly luring me.

Why does the moonlight cause the spell?  
Why does the merry song  
Of the twittering bird in the boughs above  
Cause me to wish and long?

I do not know, I can not tell,  
But yet I know 'tis true:  
And oft' I wonder and oft' I say,  
" Why do I think of you? "

## Honorary Members

Dr. F. L. Stevens.	Prof. F. C. Reimer.	Mr. J. C. Temple.
Mrs. F. L. Stevens.	Mr. Hall.	Mr. Wm. Kerr.

The Club meets semi-monthly, and discusses such subjects as relate to Biology, mostly in the form of essays. Personal observation is an important feature. That member receiving the largest number of points during the year for observations rendered, is presented with a "Universal Planter," with all modern attachments, by the Cole Manufacturing Company, Charlotte, N. C., for which the Club is very grateful.

REFRAL SCIENCE CLUB

## The '07 Quartette

At the beginning of the Christmas term of 1905, these four fellows were thrown together for class work. Each soon noticed that the others had some talent and love of song, so when they knew one another better they joined in, each with a different voice, and formed this, "The '07 Quartette." It soon attracted the attention of the Electrical-Mechanical division, and later the whole College. The picture here given is as they appear ready for one of their late-hour serenades, which are enjoyed by those who hear them.

First Tenor—C. B. WHITEHURST, Beaufort, N. C.

Second Tenor—C. J. BRYAN, Washington, N. C.

First Bass—J. M. MILLS, Raleigh, N. C.

Second Bass—J. O. SHUFORD, Gastonia, N. C.

Motto:—Harmony.

## Electrical Engineers (?)

PROF. W. M. ADAMS,

Lord Keeper of the Great Meters and Other Instruments.

C. J. BRYAN, Chief Differentiator of the Great Ladder.

R. H. CARTER, Principal Manipulator of the Mighty Brace and Bit.

L. F. CARLETON, Chief of the Great Hole-Drivers in Brick.

E. V. FOWLER, Grand Adjuster of Cleats and Rosettes.

J. C. PARKER, Grand Chancellor of the Switch-Board.

F. M. PARKS, Worshipful Climber of High Poles.

C. B. WHITEHURST, Principal Hanger of Lamps and Chandeliers.

# Trumps

MOTTO:—Prepare for inspection.                      COLORS:—Emerald and White.

PLACE OF MEETING:—One of the joints.

TIME:—After 11:59 P. M.                                      PASS-WORD:—Trump.

## Toast

Here's to the nine Winstonians,  
They who dare to do;  
And may each soon be able  
To paddle his own canoe.

## Members

## Senior Class Diary

- Sept. 5. College opens. Seniors at last.  
" 6. Turlington taken for a Freshman.  
" 7. Drill.  
" 8. Garner takes Professor Bonn for a Freshman.  
" 25. Battie buys a new sword.
- Oct. 3. Mills and Meador (on drill) have dispute about drill regulations.  
" 7. Chicken and ice cream for dinner.  
" 9. Truitt resigns leadership of Bible Class.  
" 12. Gilbert tries to execute "On left into line, double time."
- Nov. 9. Battie has picture taken while "O. D."  
" 12. "Bully" Mills advertises as a Phrenologist.  
" 15. Hemphill invents an ohm meter.  
" 29. Defeat at Richmond. Extreme quietness.
- Dec. 3. Bivens goes to chapel.  
" 4. Eldridge confesses to be in love (scientifically).  
" 13. Examinations begin.  
" 17. All C. E. Div. passed on calculus. Great rejoicing.  
" 25. Dinner at home. Sickness follows. Why?
- Jan. 1. '07 a realization.  
" 8. Sykes returns and is in love.  
" 9. Mills phrenologizes a barrel head.  
" 15. Dr. Winston absent Political Economy. Great rejoicing.  
" 9. Battie takes street car to town.  
" 16. Shuford takes Bryan and Whitehurst to drug store in order to avoid passing library in blue shirt.  
" 19. Tired of hearing "BUSSEY."  
" 23. Michael gets married. (See prophecy.)  
" 25. Weaver defines love—only thing not controlled by a trust.
- Feb. 1. Shuford mistaken for Poindexter.  
" 12. Graves calculates the frequency of the dynamos in power-house in Watts.  
" 15. AGROMECK goes to press. Thank God!

AN ALL 'ROUND ATHLETE.

## Go To

- B. T. Mial for the most energy.
- F. C. Michael for loquacity.
- Maple Mills for self-confidence.
- J. E. Turlington for oratory.
- E. F. Ward for the best financier.
- L. J. Schwab for good military bearing.
- A. J. Wilson for the best all-round athlete.
- L. J. Herring to get credit.
- G. F. Hinshaw for good common sense.
- C. J. Bryan for a musician.
- R. J. Gill for poetry.
- R. H. Carter for a dun.
- V. Sykes for physical strength.
- L. F. Koonce for modesty.
- O. F. McNairy for an editorial.
- C. L. Garner with your perplexing problems.

"Our Major"

## Grindings

Oh Lord Let it  
Rain in my corn-field.

Prof. H.—" Mr. McBrayer, what is a false doctrine? "

McBrayer.—" It's when the Dr. gives you black pills for a hurt arm. "

Dr. Winston (lecturing to Senior Class on Political Economy).—" Where is Mr. Pinner to-day? "

White.—" He belongs to the C. E. Division and is out running the transom " (transit).

Larogue (eating on his third pig foot).—" Boys, I am sure going to eat a yard of pork to-night. "

Senior.—" Pass the sugar, please. "

Hendricks (reading letter from girl).—" Did you ask for this? "

S.—" Gardner, what did you make on Analytics this morning? "

Gardner.—" The difference between my grade and 100 is enough to pass any man. "

## A Little Short Bray

Within these walls some men we have  
Whose names a semblance bear,  
And if you'll patient be awhile,  
To mention some, we'll dare.

A *Fox* we have whose cunning tricks  
Have *Long* been known around;  
He knows the *Green Fields* and the *Marsh*  
Where *Hunters* are not found.

Across the *Hill* and *Underwood*,  
The *Springs* of water flow  
In to the *Pool*, where very oft'  
The *Buck* doth long to go.

There was a *Plott* one time to *Steele*  
Of *Eatons* near a *Peck*;  
" *Stanback*," they cry, and then they *Call*  
A *White* man and a *Block*.

When they were called into the court  
At *Middleton*, they swore  
They did not have the *Price* in *Gold*,  
But at the *Banck* had *Moore*.

The *Farmer* judge, with *Eagle* eye,  
His *Brozen* head in his *Hood*,  
Declared that he would *Clement* be,  
If they would all be good.

No *Moore* they say, but go away,  
*Albright* their faces *Shine*,  
And on the *Morroze* they have found  
A *Drake* on which to dine.

They walked a *Mial*; the *Carpenter*  
Was *Moody* all the day,  
The *Plummer* and the *Weaver* fought,  
The *Mason* led the way.

\* \* \* \* \*

Our "poetry" is not so good  
As *Spencer* might have done;  
But we were not so serious,  
And did it all in fun.

SIMPLE SIMON.

VIEW LOOKING NORTH.

## The Board of

- A**n honorable man with a handsome face,  
Whose mysterious travels you cannot trace. —That's Ward.
- G**rowling always on account of the work brought on him by his  
literary talents. —That's McNairy.
- R**unning away in time of use,  
Coming back without excuse. —That's Tate.
- O**nly one of his class. He's a Kentucky thoroughbred.  
—That's McConnell.
- M**uch can be said on both sides, for he's in the middle.  
—That's Pinner.
- E**levated is his speech when in dramatic tone.  
—That's Shuford.
- C**an't understand; don't see how you do it; Kent don't do it that way.  
—That's Truitt.
- E**ver busy, always prepared,  
You can't imagine a more industrious lad. —That's Eldridge.
- D**oing stunts in hot air is his strong point.  
—That's Graves.
- I**" have a bill against you. Pay up at once—can't wait."  
—That's Carter.
- T**ried and found wanting in feelings for the fairer sex(?) (?)  
—That's Garner.
- O**ver and over we have gone into his room to come out sweeter but  
with lighter pockets. —That's Herring.
- R**eady, waiting and willing to give his *huge* heart to the first girl  
that smiles at him. —That's Carleton.
- S**tatesman, scholar, diplomat, and ever ready to use his influence  
for the right. —That's Hinshaw.
- 07'**—That's IT.

"AFTER."

## After

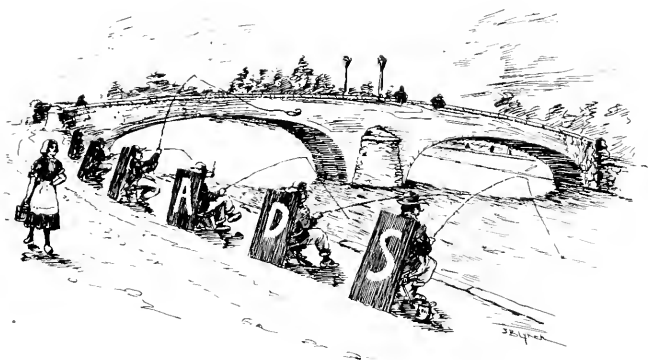

All through the gloomy daytime  
The busy task was on,  
And into the midnight hour,  
And oft' to the coming morn.

But now 'tis done, and dimly  
The fading lights are seen;  
And stillness settles slowly  
Where murmur'ing sounds have been.

The night Queen reigns supremely:  
Her soft and silvery beam  
Now soothes the disappointment  
Of unattain'd dream.

But Morpheus bids us slumber,  
And we forget the care  
Amidst the brightest visions  
Of fancied faces fair.
